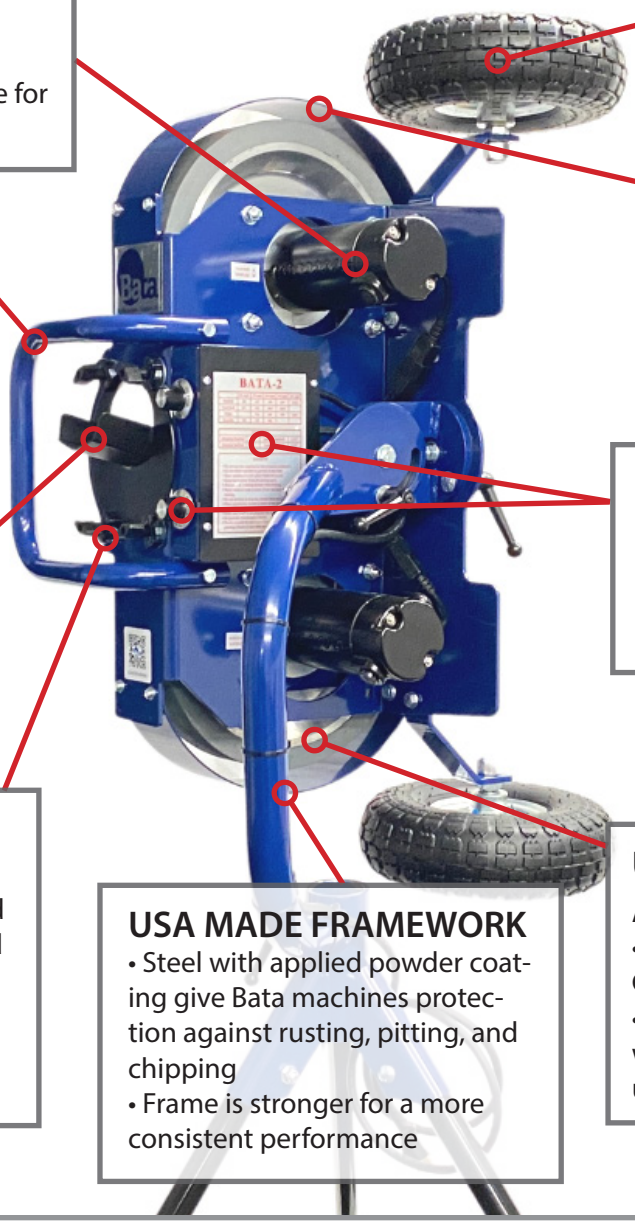
Bata 2 Features

10 Year Limited Warranty
100 mph
Virtually Any Pitch
Popflys & Grounders



USA MADE MOTORS
- Manufactured specifically for Bata to our specifications
- Performs better and lasts longer since they are made for our machines

PNEUMATIC TRANSPORT WHEELS
- Allows you to easily wheel the machine across a field or facility

STEEL FENDER
- Safety
- Greatly reduces accidental contact

STEEL HANDLE BAR
- Easier to handle and carry the 115 lb machine

USA MADE SPEED CONTROL BOX & DIALS
- Gives the most reliable pitch speed, adjustability, & longevity on the market

STEEL FEED CHUTE
- Will not warp
- Easily and effectively centers the ball for greater pitch consistency

FEED CHUTE ADJUSTABLE KNOBS
- Allows feed chute to be rotated
- Feed chute needs to be rotated to center the ball when set up for curveballs
- Greatly improves pitch consistency

USA MADE FRAMEWORK
- Steel with applied powder coating give Bata machines protection against rusting, pitting, and chipping
- Frame is stronger for a more consistent performance

USA MADE CAST ALUMINUM WHEELS
- Made by Edelbrock with soft tread Goodyear rubber
- Longest lasting pitching machine wheel on the market for longevity of use with consistent performance

How a pitching machine gets put together makes a huge difference. We test every wheel for balance, run out and durometer. The wheel is then fine tuned and is ready to be installed. We then match each wheel to the specific machine and adjust and tune the controller to the wheel and motor combination to ensure performance, reliability, and longevity. The machine goes through a final quality check, then is ready to be boxed up and shipped! See for yourself the difference real quality components and attention to detail in assembly make.

BATA: The finest pitching machine available.
