Process + Care

Colour is tinted through the porcelain clay to provide a colour depth not available from surface glazing. clear glaze is then applied to the interior of each piece leaving the exterior with a vitrified stone-like surface that becomes smooth with handling. mud australia porcelain is oven, microwave, dishwasher and food safe – making it ideal for domestic and commercial use at the table and in the kitchen.

Please Note

mud australia porcelain is a handmade product and should be treated with care during use. In the dishwasher, make sure items are not touching. To avoid scratches on the glaze ideally your mud porcelain will either be stored in plate racks or use linen/felt between each item. Irregularities in size, glaze and texture reflect the handmade nature of the product and should be embraced. If sold direct we will replace breakages and faults notified within five days of shipping/purchase.
