WHAT IS OMTECH LASER?

OMTech Laser is a US-based company specializing in Fiber and CO2 laser machines with industry-leading affordability, support, and service.

We garnered over ten years of experience in the laser engraving industry before launching OMTech out of Anaheim, California. Built by skilled laser technicians and 30-year industry veterans, we quickly grew into the largest online seller of laser engravers.

To challenge the laser industry with original innovations, we assembled a team of engineers to research and develop a new line of high-power fiber laser cutting machines, right here in Southern California.

Thousands of R&D hours later, we're launching a new solution to help metal fabricators and parts manufacturers speed up their production and increase cut accuracy while reducing initial costs. Whether you mass-produce crude metal components or craft one-of-a-kind wonders, OMTech has the perfect laser tools for your metal fabrication tasks.

OMTECH US CS & Technical Support Team

WHY CHOOSE OMTECH?

A FEW GOOD REASONS.

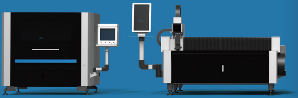
1 . Because we help you make more money with fast cutting speeds and less routine maintenance.

2 . Because we know laser machines. We have the experience and expertise to train your operators and support your machinery, right here in the USA.

3 . Because we don't break your budget. We're proud to offer the best value in the laser cutter industry.

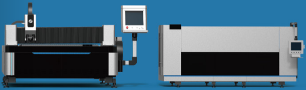
4 . Because we understand your unique needs. Our in-house experts engineer custom machine solutions that fit your business's niche operations.

5 . Because we're trusted worldwide. Every year, over 10,000 people across the globe choose OMTech for their laser cutting needs.



POWER.
PRECISION.
RELIABILITY.

OMTECH DOES MORE !



INDUSTRY APPLICATIONS

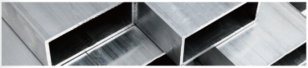
A VERSATILE MACHINE FOR A VARIETY OF APPLICATIONS.

OMTech's Fiber Cutter (FC) Line is the most desired high-powered laser cutter for varied metal fabrication purposes. It comes with an option of using the industry leading IPG laser power source or the more affordable Raycus power source. We are able to customize the laser power options from 1.5kW to 4kW, higher powered wattages are also available upon request depending on your business' needs. With a maximum speed of 1333mm/s (1G acceleration), you can rest assured that this machine has high mass production capabilities with precise accuracy. Additional add-ons such as dual shuffle beds, enclosed coverings, tube cutting features and even robotic arms are available for customization.

Designed and assembled in the USA by OMTech's US based team of laser engineers, we deliver high quality results at affordable prices. All Fiber Cutter machine purchases are backed by a reliable 2-year warranty, on-site installation and training, accompanied by a lifetime US-based technical support team.

AUTOMOTIVE INDUSTRY

Our metal fabrication machines can be used to create gear tools, connectivity tools, cut out car doors and other automobile steel hardshell parts with precise accuracy.



CONSTRUCTION MATERIALS

FC laser machines are able to fabricate simple tools like nuts and bolts, and also large sheet panels for windows, roofs, floors or even welding out sturdy pillar tubes.

FURNITURE MANUFACTURING

The Fiber Cutting machine can fabricate and manipulate materials to whatever design you desire. It is widely used for distinctly artistic furniture designs that require pinpoint cutting precision. You can create chandeliers, neon lights, large sculptures and kitchen materials.

AEROSPACE ENGINEERING

The OMTech FC machines provide aerospace grade cutting precision and power. The metal fabrication machines are used to create parts for airplanes and spacecrafts.

PROTOTYPE PRODUCTION

Our industrial metal cutting machines can be used in the manufacturing and designing of production metal prototypes which is a vital engineering process in product development.

ARTISTIC APPLICATION

The high precision of OMTech's FC laser machines make it ideal for creating artistic sculptures and metal statues. The creative designs are virtually limitless.

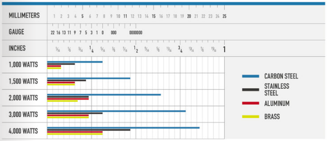
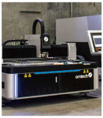
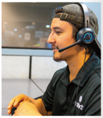
LASER RESONATOR







THE MOST RELIABLE US TECH SUPPORT TEAM

OMTech proudly stands behind its comprehensive US-backed warranty program. You should feel confident with your machine purchase and be assured that your business will not face any obstacles when maintenance or repairs are required. Help will be provided by our expert technical support team based here in the US. With our 2-year warranty plan and 30-day money back guarantee, you can be confident in our commitment to every single one of our valued customers.

THE INSTALLATION PROCESS

OMTech provides complimentary on-site machine installation and operations training with every FC machine purchase. All accommodations are paid for by OMTech except for our technician's travel expenses, which will be charged at a reasonable price to the purchaser. OMTech also provides comprehensive technical support via e-mail, telephone, or text, according to preferences.

LIFETIME US-BASED SUPPORT

Every FC Series machine purchase includes a lifetime 365-day US time zone based customer support. We understand that these machines are vital to your business, hence, OMTech's priority is making sure our customers are never down. With an easily accessible phone support line, we will have an OMTech laser expert assisting you in less than 10 minutes.

ON-SITE INSTALLATION & TRAINING

Your OMTech FC machine purchase includes professional on-site installation and training in-services for your operators led by OMTech Technicians. Your team will learn all basic aspects of fiber laser safety, machine setup, operation protocols, maintenance, software, and troubleshooting issues.

TOP REASONS TO FINANCE YOUR NEXT PURCHASE

- **Get it right now**
When the newest piece of equipment is crucial to your business, waiting for the funds to be available isn't always an option. With financing, you won't have to put forth a hefty upfront payment.
- **Know what you're paying each month**
Financing allows you to plan and budget with a predictable monthly payment.
- **Simple, quick financing**
With dedicated online applications you can complete in minutes, you could get quick turnarounds on approvals.
- **Keep your cash reserves available**
Paying for equipment over time by financing means there's no huge cash burden with your purchase.
- **Take advantage of competitive rates**
Financing can be a cost-effective solution.
- **Reap some serious tax benefits**
Financed equipment can be deducted as an operating expense in the period in which it's paid, which reduces the overall cost. Payments are also treated as expenses on the income sheet, so there's no need to worry about depreciation.

3 simple steps to get started

Apply online in as little as 3 minutes. → Sign your documents electronically. → Get your equipment.

First Citizens Bank

We have partnered up with First Citizen Bank to provide the best financing options for our FC customers. With loaning options of up to $1 million, you can rest assured to have enough capital to invest in the metal fabrication machine of your dreams without a hefty initial down payment.

But of course, we are flexible on accepting other financing options of your choice as well!

CALL OR EMAIL FOR A CONSULTATION WITH A SPECIALIST

You're not just buying a laser cutter. You're forming a connection with industry specialists invested in your success. With free onsite installation, expert-led training, and lifetime technical support, we provide all the tools you need to achieve your metal cutting goals. Each laser includes a strong 2-year warranty trusted by businesses throughout North America. Along with excellent service, our affordable prices and easy-to-use financing program make our laser cutters the most accessible in the industry.

There's no better way to go than OMTech. Set up your appointment with our experts today and explore your many choices and options.
We'll help you choose the right Fiber machine for your business needs.

Pre-orders are now open, reserve your machine with a partial down payment. Give a call to our FC sales representatives to curate your customized quote and save thousands.

DESIGNED ASSEMBLED IN USA

"FC-105SA, DOUBLE THE PRODUCTIVITY WITH SAFETY"

OMTech FC-105SA is the ultimate versatile package for all your metal-cutting fabrication needs. Comes equipped with a dual-shuffle table doubling the amount of production on one machine while the tube processing unit fits conveniently on the side of the machine. This model is perfect for those businesses wanting to do more without the need of additional equipment. Equipped with the industry leading IPG 8 to 20 kW power source, you'll be able to easily cut twice as much steel, brass, aluminum, copper sheets and pipes. Includes all you need to get started, a reliable 2 year warranty, onsite installation plus training, and lifetime US-based technical support staff. Designed and assembled in the USA by OMTech's team of expert laser engineers to meet all your light to heavy metal fabrication needs.
