Setting the industry-first benchmark with two interactive touch screen panels. The innovative design introduces an additional middle touch screen so you can easily glance at the stitch settings while sewing. Information on both screens are in sync, so adjusting the settings on one also changes the other.

CONTINENTAL M17

Capacitive touch screens, just like a smart phone.

CONTINENTAL M17

Painted aluminium body.

Built for strength. Built for speed. Built to last.

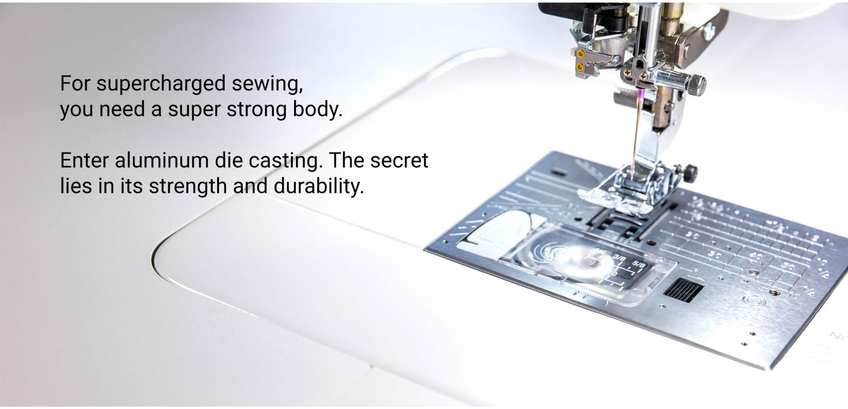
5



For supercharged sewing,
you need a super strong body.

Enter aluminum die casting. The secret
lies in its strength and durability.

Strength and beauty. Hand in hand.

Tough is great, but we also wanted to make it scatch-resistant and classy looking.

Continental M17 underwent a meticulous exterior design overhaul to be in line with the flagship model's vision of functional excellence. The beauty is expressed through straight lines, conveying a sense of stability, and polyhedron configuration, conveying a sense of hardness. Finished off with painted hard tactile finishing, metallic components, and black acrylic panel sheeting, Continental M17 delivers a showstopping look.

Refreshingly new with the familiarity of the old.

We have restructured the screen make-up and hierarchical system in the user interface making it simpler and easier to navigate.

Seamless design. The flat design of the selection keys with a black base gradation gives a sense of depth and unity with the sewing machine body. In other words, just gorgeous.

850 built-in stitches including 13 buttonholes. Wow.

A.S.R. (Accurate Stitch Regulator)

Your stitches will always be the same length during free motion quilting. The new A.S.R. automatically adjusts the sewing speed with the speed that the fabric is moving.

A.S.R. feet for infinite sewing possibilities.

4

Closed-toe foot ASR-QC
Open-toe foot ASR-QO
Clear-view foot ASR-QV
Ruler work foot ASR-QR (industry first)

1,230 built-in embroidery designs including 225 new designs.

Continental M17 packs an entire catalogue of free embroidery designs in our machine. From easter to wedding to the natural world and everything else in between.

Awesome Accessories

for every kind of sewing.

Add versatility and control to your sewing with over 35 standard and optional accessories.

Plus 3 new feet. Piping Foot. Bi-Level Foot. Lap-Seam Foot.

New floating mode.

Now you can raise the foot ever so slightly to adjust your project while preventing layer slippage.

Floating mode

- Small turning circle
- No need to replace the foot
- No damage to fabric

Dual feed

- Stabilize fabric
- Almost all stitches can be sewn using the dual feed system (Manual mode only)

Pre-order starts
