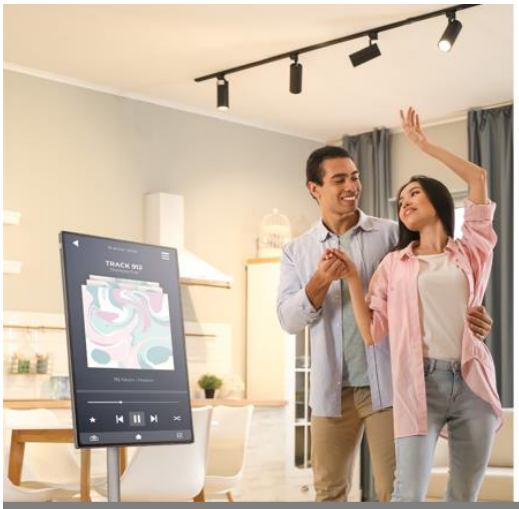
THOMSON Go Plus : Mobile, Touchscreen, and Ultra-HD: Innovation at Your Fingertips

THOMSON is redefining the concept of mobile television, making it even more versatile. With the Go Plus, the experience reaches a whole new level thanks to the addition of a touchscreen, transforming the device into a giant tablet. On top of that, its 4K Ultra-HD resolution and sleek metal finish make this TV an ideal solution for both home and professional use.



A Sophisticated and High-Performance Mobile Screen

After the success of the Go TV, the first battery-powered mobile television, THOMSON now unveils the Go Plus, an even more advanced model. This screen features a 32-inch touchscreen, mounted on an adjustable stand with wheels for optimal mobility. Powered by a battery that provides up to 4 hours of autonomy, it can function away from any power outlet. The Go Plus adapts to any situation ð whether for entertainment at home or outdoors or for professional presentations.
