inland Inland Diamond Bit Reference Chart

Inland is the only manufacturer that plates its own bits. They are plated right in Madison Heights, in our own ISO 9001:2008 Certified plating lab. Inland bits are guaranteed against defects in manufacturing and we will replace defective bits at no charge for the life of the diamonds under normal use. Use Inland bits on all machines with a 5/16" (.312") motor shaft / arbor. You will need to make sure the bit opening in the work surface is suitable for the diameter you are using.**NOTE:** *Highlighted cells indicate bits included with that machine when purchased.*
