A-1020/A-1021

MODEL	LOAD CAPACITY	MAX LIFTING HEIGHT
A-1020 A-1021	3300LBS	4.3 "

- CHARGING TIME: 3 HOURS
- WORKING TIME: 6 HOURS

Innovative Design

LITHIUM BATTERY

3HR

CHARGING TIME

Fast and short boost charge , only 3 hours charging is sufficient to achieve full charge.

6HR

WORKING TIME

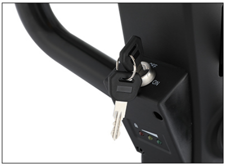
Powerful and robust energy. 48V 20Ah battery voltage. A fully charged battery can work continuously for 6 hours.

24/7

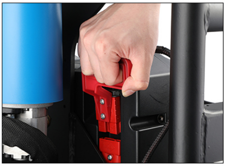
WORK SHIFT

Prepare just two pieces of lithium batteries. One charging, one working, 24/7 without break.

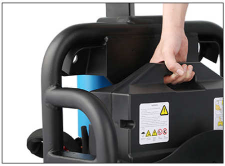
Battery Remove and Charging



1.Turn off the key switch
to ower off the vehicle.

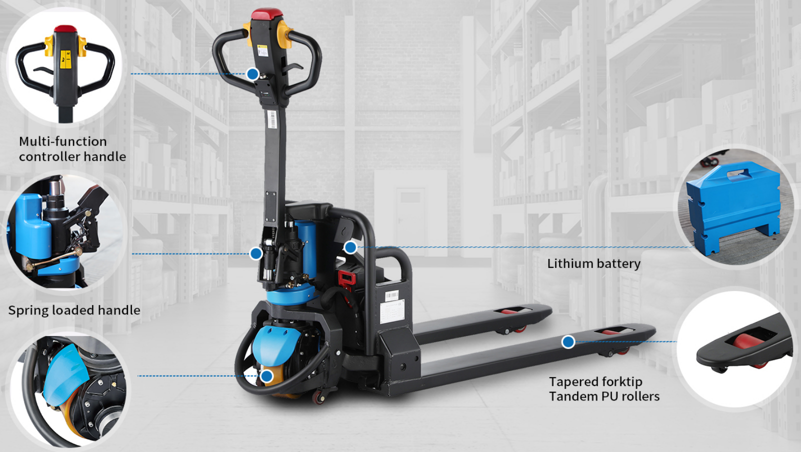


2.Pull out the connecting plug.

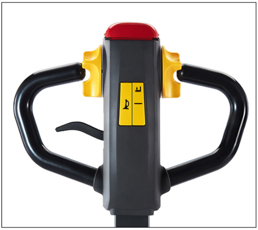


3.Take out the battery in vertical direction, and insert it to charging base

Overview of the Truck

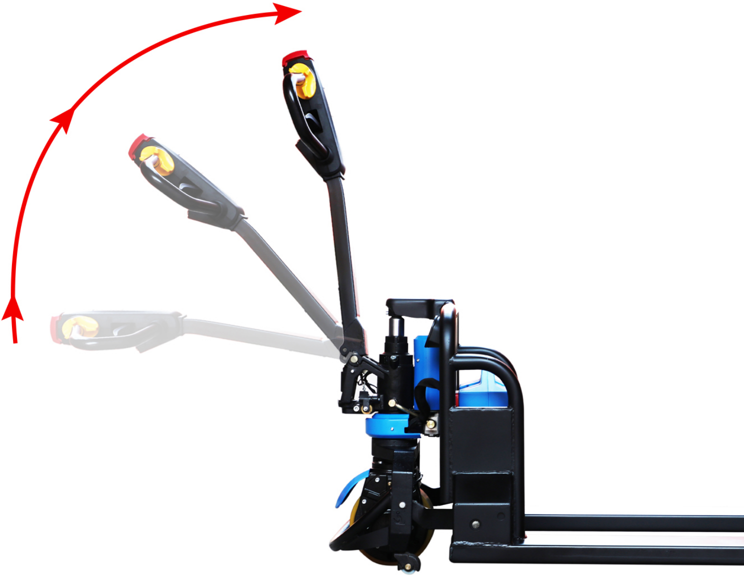


Tailored Features



- Emergency reverse button on the top.
- Integrated control handle, including butterfly thumb travel control, horn and lifting button, lowering lever and emergency reverse button.
- Rotate the butterfly thumb controller, to move forward or reverse.
- Battery voltage lamp indicators.

Handle Working Angle



Structural Integrity

01 INTEGRATED ROCKER ARM

The rocker arm is casted in single piece, intensifying the strength and structure.

02 LESS WIRING, EASY SERVICE

Mechanical and electronic components are easy to change and service.

03 BRUSHLESS MOTOR

Stepless speed control provides better and smoother speed changing.

MODEL NAME	A-1020/A-1021
Load Capacity	3300 LBS
Lowered Height	3''
Fork Length	45''/48''
Overall Fork Widths	22''/27''
Maximum lifted height	4.3''
Service Weight	320 LBS
Battery type	lithium
Rated Voltage	48V/20Ah
Turning Radius	57''/59''
Overall length	65''/68''
