

# RIBBON MATE

We are proud to introduce the Ribbon Mate. The Ribbon Mate is an effective and efficient way to attach the ribbon to the Easel Back and Strut.

While we are still confident and stand behind the strength of our patented Easel Hinge, at times larger heavier decorative frames do require a ribbon to help act as a hard positive stop. Framers agree that this is as aesthetic as it is functional, but overwhelmingly complain that this is a painstaking process.

Crafts Ribbon Mate has a built in measuring guide to achieve the precise length each and every time.

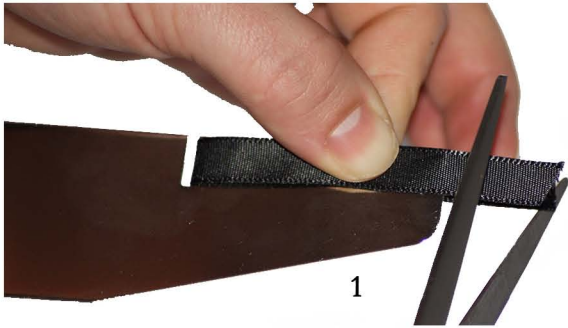

The placement of the ribbon has been predetermined for the appropriate length of ribbon and the dual Rosette holder allows you to attach both sides at one time.

# Ribbon Mate - Guide

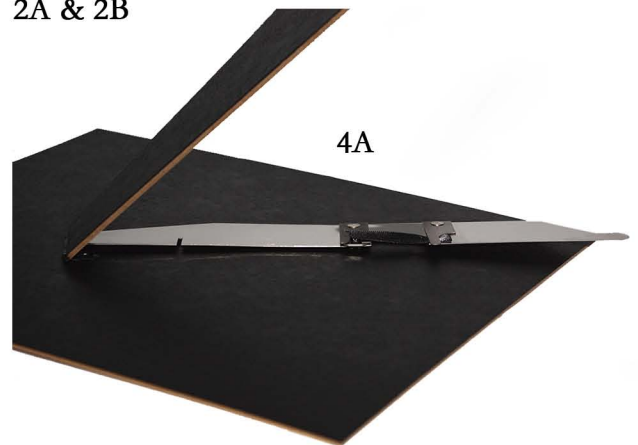

Step 1: Measure and cut ribbon as illustrated in 1.

Step 2: Insert rosettes face up and down as illustrated in 2A & 2B

Step 3: Fold ribbon in half and slide under point 3A. Place other end of ribbon over each rosette as illustrated in point 3B.

Step 4: Insert completed assembly, using the hinge barrel as a stop point 4A

Step 5: Lightly tap easel to attach rosettes, remove Ribbon Mate and tap with hammer to permanently attach ribbon to finished back point 5.
