

# LATCH-CATCH MACHINE

---

**C**raft's Latch-Catch Machine, LCM-00, is a pneumatically operated, hand-fed machine that efficiently applies Craft's line of self-fastening latches and catches to a wide variety of paperboard and wooden box shapes and sizes.

The self-fastening latches and catches are hand loaded into a magnetic "driver" which guides and supports the prongs and allows the pieces to be driven into both soft and hard woods or paperboard. The LCM installs a variety of latch and catch combinations.

Craft's Latch-Catch machine is one of many time savers available in our ever-growing extensive line of equipment designed to efficiently assist every box manufacturer in all levels of hardware application. Please call us for more information.
