

**b** tk:aro

# tk:aro

The glass of water you take with you.

A transportable glass water bottle with protective stainless steel cover.

Designed with maximum durability and an airtight seal, Tkaro can accompany you everywhere.

Reusable, recyclable, transportable and dishwasher safe.

Its **pureness of material** provides an alternative to our growing environmental concerns. Specifically, the consumption of fossil fuels in the production and transportation of single-use plastic bottles, the dumping of these bottles in to landfills world-wide, and the leaching of Bisphenol-A from plastics in to our bodies and ultimately our environment.

Glass assures a cleanliness that is not possible in plastic or stainless steel.

Its **pureness of form** provides an aesthetically pleasing solution for our daily water consumption on the journey to good health.

500 ml or 2 cups

Customize Tkaro with your corporate logo, name or your organization's insignia. Please contact us for more information.

U.S. Patent Pending.
