# Comfort & Ergonomics

**Armrest Height and Width Adjustments**

**Seat Tilt Adjustments**

**Backrest Height Adjustments**

**Seat Height Adjustments**

**Armrest Radius  
(applies to both armrests)**

**Backrest Tilt Adjustments**

Getting your body into the proper position before any procedure is extremely important and one of the most overlooked, but necessary parts of every procedure. Sitting in the correct position can not only make the procedure more comfortable, but it can actually extend the years you can practice.

The JEDMED Micro Stool was designed with comfort and ergonomics in mind.

**Normal Sitting Position**

**Tilted Forward Position**

# Micro Stool Series

Micro Stool with hand operated adjustment from 18.5" to 26" seat height

**04-4390** Standard (no armrests)

**04-4393** With one armrest

**04-4395** With two armrests

### Option

**04-4418** 14" armrest pads (set of two)

The micro stool series is anatomically designed to give you hours of comfort when performing delicate procedures. Specially designed for microscopy, the fully adjustable armrests swing into position to give you a stable reference base for precise hand movements. The pneumatic lift produces the proper height for your comfort and posture. The seat and backrest articulate independently to get you into a comfortable, ergonomic position while performing long, delicate procedures. The waterfall seat design relieves pressure on your femoral arteries and the lumbar support aids in correct posture.

Micro Stool with foot operated adjustment from 18.5" to 26" seat height

**04-4400** Standard (no armrests)

**04-4403** With one armrest

**04-4405** With two armrests

### Option

**04-4418** 14" armrest pads (set of two)

All micro stools are also available in a short version which has a 16.5" to 22" seat height.

The JEDMED Micro Stool is upholstered with heavy-duty fabric that is available in several designer colors. Color samples are available upon request.

# Surgical Stool Series

Surgical stool with waterfall seat and adjustment from 20" to 27.25" seat height

**04-4410** Standard (no armrests)

**04-4415** With two armrests

Option

**04-4418** 14" armrest pads (set of two)

The Surgical Stool series is anatomically designed with a choice of waterfall or saddle seat to give you hours of comfort when performing delicate procedures. Specially designed for surgical applications, the optional, fully adjustable armrests swing into position to give you a stable reference base for precise hand movements. These stools are completely adjustable in seat tilt and backrest position to create the custom position for your posture. Height adjustment is made easy via a foot lever and can be made while the surgeon is seated, hands free. These features make the JEDMED Surgical Stool an indispensable component of your operating room.

Surgical Stool with saddle seat and adjustment from 21.50" to 28.75" seat height

**04-4440** Standard (no armrests)

**04-4442** With two armrests

Option

**04-4418** 14" armrest pads (set of two)

The JEDMED Surgical Stool is upholstered with heavy-duty fabric that is available in several designer colors. Color samples are available upon request.

# Contour Plus

Contour Plus with hand operated adjustment  
from 21" to 30" seat height

**04-4430** Contour Plus

**04-4432** Contour Plus with Wrap Around Arm

Because technicians typically lean forward during a procedure, proper posture is extremely important. The Contour Plus's unique ergonomic saddle seat helps to support an upright and proper spine angle by leaning the technician forward while allowing the feet and legs to sweep back. Adding the fully adjustable wrap around armrest provides you a suitable reference base for precise hand movements. The pneumatic lift produces the proper height for your comfort and posture. The stool has an adjustable seat height from 21" to 30" via a hand operated adjustment.

The JEDMED Surgical Stool is upholstered with heavy-duty fabric that is available in several designer colors. Color samples are available upon request.

# Micro-Tech Plus

Micro-Tech Plus with hand operated adjustment from 20" to 28" seat height.

**04-4470** Micro-Tech Plus

The Micro-Tech Plus is designed to give you hours of comfort when performing delicate procedures. The waterfall seat design relieves pressure on your femoral arteries while the fully adjustable wrap around armrest provides you a stable reference base for precise hand movements. The pneumatic life produces the proper height for your comfort and posture. The stool has an adjustable seat height from 20" to 28" via a hand operated adjustment.

The JEDMED Surgical Stool is upholstered with heavy-duty fabric that is available in several designer colors. Color samples are available upon request.

# Custom Stools

This standard utility stool incorporates an adjustable spin lift with a minimum of 21" to a maximum of 27".

**04-4300** Utility Spin Lift Stool

This stool is height adjustable via finger touch lever and a high quality pneumatic cylinder. The height range is from a minimum of 20" to a maximum of 28".

**04-4320** Custom Air Lift Stool

This stool includes a backrest to provide comfortable back support positioning. The pneumatic cylinder is hand operated with a height range from a minimum of 20" to a maximum of 28".

**04-4322** Custom Air Lift Stool with Backrest

**One of these chairs could be the solution if your neck, back and shoulders are fatigued at the end of the day.**

*"While using the JEDMED Micro Surgical stool I was able to practice full-time through my pregnancy and even worked 4 days past my due date. I believe the JEDMED stool was an integral part of my ability to work without interruption. Using a comfortable stool with a place to rest my arms is key to my daily comfort and it makes it very easy on my back. I would not want to practice without it!"*

Betty Schindler, MBA, DDS  
Sundance Endodontics / Peoria, AZ
