

Horus **HD** Digital Scope System

Multi integrated imaging System

The Horus **HD** Digital Scope System captures and records **High Definition (1080p)** still images and video. In addition to its interchangeable otoscope attachment the Horus scope can quickly and easily attach to any new or existing rigid or flexible endoscope.

This unique system utilizes the latest in **High Definition** imaging technology and incorporates it into a user friendly hand-held device.

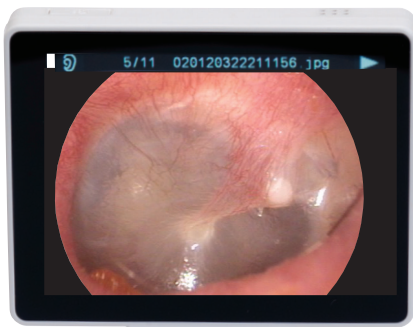

Still images and videos are simply captured with just a touch of a button and can be transferred seamlessly to a laptop or PC. These images and videos can easily be archived for later viewing.

The Horus Scope is the ultimate in image quality, ergonomics, and portability, all built into one convenient and easy-to-use **HD** video system.

JEDMED

Horus *HD* Digital Scope System

1080p **High Definition** images are captured and displayed on the 3.5" full color LCD display.

Still images and video can be captured onto the SD card for easy transfer to your laptop or PC.

The fine focus control is conveniently located where your index finger comfortably rests on the handle.

Illumination is provided by powerful integrated LEDs located at the tip of the **HD** otoscope.

Conveniently located controls make this system extremely user friendly. Most functions can be controlled with just your thumb.

The included cradle acts as both a charger and an image transfer docking station (via USB).
