SUPERFOOD SKIN CARE RANGE

# Energise

SUPERFOOD SKIN CARE RANGE  
powerful natural properties for lasting youthfulness

What we put on our skin is absorbed into our bodies and becomes a part of us.

## Made in New Zealand

This visionary skin care from New Zealand represents 8 years of meticulous refinement. These exquisite formulations have been lovingly crafted on a specialised herbal farm where essential oils are used for scents; colours are derived from nature and herbal extracts are used for enhancing health and well-being.

## Cutting-edge preservative system

Using the most recent Biomimetic technology this skin care range teems with vitality from a unique natural preservative system combining the anti aging, healing and preservative properties of citrus bioflavonoids and Totarol, extracted from the recycled bark of the New Zealand native totara tree.

## Rejuvenating 100% natural ingredients

Vision's products are 100% natural with natural/organic and, most importantly, wild harvested ingredients containing the most beneficial ingredients on the planet which are full of naturally occurring vitamins, minerals and anti-oxidants.

## Energised with Amazonian and Tahitian super fruits

Harness the powerful phytochemical properties of camu camu, with more vitamin C than any other known fruit in the world. Combat the aging process by engaging in prime skin nutrition with acai, the highest ranking antioxidant plant in the world ideal for providing essential fatty acids such as linoleic acid, omega-6 and omega 9. Delight in the incredible softness inherent in using Tahitian tamanu oil renowned for its amazing ability to relieve inflammation and reduce scars. Exceptional for skin regeneration.

## Purity maintained

To ensure purity our products are presented predominately in glass eliminating the potential migration of chemicals found in plastics, preserving the integrity of these 100% natural formulas and protecting your precious skin and health over a life time.

## Enhanced sense of well-being

The words love, forgiveness, compassion, tolerance and integrity adorn all of our labelling. Resonating with Dr. Masaru Emoto's research, these evocative messages have the power to enhance your sense of well-being, helping to transform your daily life and the world in which you live.

*These health generating products are ideal for helping to maintain a lasting youthfulness; re-energizing, mood-lifting and strengthening your mental, emotional and physical well-being as you nourish your skin.*

olive cleanser \$5.99

face superfood \$14.99

# Embrace

A ROMANCE WITH NATURE  
walking arm in arm with nature for lasting health

What we deposit into the planet is absorbed into our bodies and becomes a part of us.

## Protecting the source

We look to protect and enhance the bio-ethnic diversity (species, habitat and the associated knowledge, customs and prosperity of indigenous cultures) of the territory from which ingredients are derived. We support projects like the Amazon Friendly programme, a model farm in Labasa Fiji and we prize wild harvest ingredients most of all as they keep the natural environment, and the people who depend on it, intact.

## Advanced eco-packaging

Stylish yet minimal packaging that is biodegradable, compostable and incorporates a refill / recycle system. Plant based adhesive labels made from wood cellulose and corn. All swing tags and wrap tags are sourced from sustainable forest or made with recycled paper and are printed with soy inks. We use potato filler in boxed packaging and place your purchase in a vegetable oil based bag or an organic cotton bag when you walk out the door. And it looks stunning - We've made 'green' look sexy!

## Biospherically Correct indicator

All Vision products have a unique Biospherically Correct rating which provides a simple 1, 2 or 3 indicator (3 being the best) that depicts each product's environmental sustainability and social responsibility performance at a glance.
