

GIVING BACK TO OUR COMMUNITY

ANNOUNCING KUZE FUKU & SONS' NEW 75% ISOPROPYL ALCOHOL HAND SANITIZER

Made using our facility and capabilities to help both individuals and professionals in the battle against COVID-19

St.Cousair, Inc., maker of KUZE FUKU & SONS food and drinks, is happy to announce the production of 75% Isopropyl Alcohol Hand Sanitizer for personal and professional use.

Our company normally produces apple cider vinegar drinks, jams, sauces, and other grocery items for sale online and in regional grocery stores. Due to the current medical crisis, we decided to use our resources to produce this hand sanitizer as a way of giving back to the community and to the American people who so generously welcomed and helped us when we first arrived from Japan and started our business here in 2017.

It is our hope that this product will in some way return the favor and provide some help to hospitals, medical personnel, and others in our community working tirelessly to help all of us through this difficult time.

As we all work together during this difficult time, we at St.Cousair realized we had the means to give back to the community by producing much needed hand sanitizer using our own facility, equipment, and staff in Newberg, Oregon. Our Hand Sanitizer is produced with permission from and according to the guidelines and requirements of the FDA and the WHO. Special thanks to Cascade Columbia Distribution Co., supplier of key ingredients needed to make the hand sanitizer, and to Taylor Made Labels for fast tracking our label printing needs.

Our first 2,000 bottles will be donated and delivered to hospitals, churches and local government in our area to help fight against COVID-19.

To help support our ongoing production efforts, please consider shopping from our selection of delicious food and drinks available on our online store at kuzefukuandsons.com!

PRODUCT INFORMATION

Isopropyl Alcohol Antiseptic 75% Topical Solution Antiseptic Hand Rub, Non-sterile Solution

- Active Ingredient: Isopropyl alcohol 75% v/v
- Available in 16 fl. oz. glass bottles for use both by individuals and medical professionals
- Can be used to help fight against the spread of COVID-19
- Available for single item online purchase at kuzefukuandsons.com
- Bulk orders available for hospitals and other public institutions
- The presence of clear sediment is mainly due to minerals in our natural water and does not affect the antiseptic effectiveness of the product.
