

## CANCER SKIN CARE

### QUALITY SKIN CARE WHEN DEALING WITH CANCER

#### DEALING WITH CANCER

Are you personally dealing with cancer? Do you have a friend, family member, relative, co-worker who is dealing with cancer? As slow as it seems at times, treatments today are advancing. One area, though, that has not changed over the years is how to deal with the trauma of chemotherapy and radiation as they affect the skin, hair and nails.

Far too many times cancer patients hear people say 'Oh, try this', solely due to the fact that they were given samples, many of which offer little to no true benefit. Having personally faced these obstacles and continuously hearing from friends, employees, cancer patients and volunteers who have been looking for high quality beneficial products, we decided to do something about it.

A-Cute Derm® has developed the Reprev™ products that are not only great for the skin but are designed specifically for embattled skin, during and after chemotherapy and radiation, which can create problems including burns, cracking tissue, chafing skin, infection and severe nail changes. We also know that no one product can help every problem. Today, we are proud to offer a complete program geared specifically for the damaging effects created by cancer treatments.

Your skin, hair and nails can and will go through transitional changes during your treatments. You may develop Fibrosis following surgery, chemotherapy or radiation. Some of these changes will affect you long term. Women, who undergo cancer treatments may experience early onset menopause. Reprev™ products will minimize the downside of cancer treatments and, maximize your ability to look and feel better faster, while maintaining healthier skin beyond your treatments and for years to come. Reprev™ maintains extremely high criteria to help you to maintain your appearance and at the same time deliver nutrients that offer significant benefits for you and your skin's well-being.

Reprev™ products can be used by anyone desiring high quality, gentle skin care maintenance. These have been developed by a Board Certified Dermatologist along with a Ph. D Biochemist, who have significant backgrounds in skin care and cancer treatments. Every item is produced with tender, loving care by individuals, many of whom have been personally afflicted by cancer.

It is our responsibility to help you understand the problems that you will face, what works, why it works and how to best use the products. We hope that you will tell everyone you know about this wonderful program as we make cancer survivors as comfortable as we can for years to come.

A portion of every product sold is donated to non-profit cancer organizations supported by volunteers who are themselves cancer survivors. Please feel free to contact us if you know

anyone who is afflicted with this disease or any of their family members who need one-on-one assistance to help find their way through this ordeal. There is no cost for this service. As a cancer survivor, I can attest to the miracles and other gifts that life has to offer. There is always HOPE and I am living proof of it.

Best Regards,

**Bill Davis** (picture)

## **YOUR SKIN CHANGES DURING CANCER THERAPY**

It is remarkable how life can change in an instant. As a physician specializing in Diseases of the Skin, Hair and Nails as well as Cosmetic Dermatology, I see many patients and family members afflicted with cancer. As difficult as cancer is you do have control over your dignity, self-respect and appearance. It is critical that you keep a positive outlook and take care of your skin along with an effective program of products to meet your needs.

Treating the skin can at times feel like a chore especially when you do not feel well. It is paramount during cancer treatments to keep it healthy. A healthy appearance is an important part of your well-being and mind set. The proper products and the right skin care regimen are essential in helping you to look great and feel better. When facing cancer, a time when everything may seem out of control, taking care of your skin is a facet of your life that you can control.

You will be able to take care of most of the skin, nail and hair problems on your own. You simply need to be diligent and careful. Some of the more common skin conditions include itching, redness, rashes and sensitivity to the sun. Nails can also become darkened, brittle and cracked.

**Esta Kronberg, M.D.**

Board Certified Dermatologist, Houston, TX

'Knowing that I had cancer was bad enough. The changes that occurred in my skin...what I went through...was enough to drive me crazy. I was able to work with all of these products and they were fabulous. I used Omega36 Serum for my scalp and itch during chemotherapy. It was also a lifesaver for post radiation and scarring from surgery. The sunscreen gave me lots of moisture and protection without any greasy feel. During radiation I used the Benesal Ointment, which was a great relief for cracked heels and nails. The Bruise Crème was perfect following IV treatments, as well.'

**- Cindy N, Cancer Survivor**

A-Cute Derm has developed skin care products for my medical practice since 1999. Their products are superb. They offer the finest quality that I have been able to find throughout the industry.

I am thrilled as a physician to finally see a proven program of products specifically designed for patients who are battling skin problems associated with chemotherapy, radiation and surgical procedures. It is long, long overdue.

In closing, I can honestly say that I have never dealt with a company as dedicated and caring to the well-being of individuals. That speaks volumes to my patients and to other physicians that I deal with day-in, day out.

- Makena Marangu, M.D.

## TREATMENTS

**CHEMOTHERAPY** - While undergoing chemotherapy it is important to keep your skin as moist as possible. No matter what your skin type is, chemotherapy makes the skin drier because the drugs interfere with oil and sweat glands.

Lipids (oils found deep within the skin) have to be replaced. Adding high quality moisturizers with nutrients including proteins and vitamins that can penetrate the skin can minimize or prevent chafing, chapping and cracking of the skin, which can otherwise lead to infection, especially for a cancer patient whose immune system is suppressed.

Chemotherapy may also affect nails, retarding nail growth, causing them to become thin and brittle.

**RADIATION** is the gift that keeps on giving. Radiation can cause your skin to become red, inflamed and brittle while you are receiving treatments and for years to come. During and after radiation, the skin surrounding the treatment site may become red, dry and tender. This can begin as early as week 2 and may improve within a few weeks following the end of treatment.

(picture)

Potential long term radiation damage if not treated

(picture)

Radiation and chemotherapy can result in nail changes

(picture)

Redness and inflammation

## SKIN DISORDERS

**The following skin disorders may be typical when facing the treatments required to battle cancer:**

- |              |                   |                      |
|--------------|-------------------|----------------------|
| • Chafing    | • Fibrosis        | pigmentation         |
| • Chapping   | • Fissures        | • Infection          |
| • Dermatitis | (cracked skin)    | • Muscle Atrophy     |
| • Dryness    | • Flaking Skin    | • Nail Toxicity      |
| • Edema      | • Hair Loss       | • Peeling Skin       |
| (swelling)   | • Hyperpigmentati | • Photosensitivity   |
| • Erythema   | on                | (reaction to light)  |
| (redness)    | • Hypo-           | • Pruritis (itching) |

**FOLLOWING TREATMENTS** your skin may appear darker than usual. This will fade with time. Your skin may stay dry for a few months once treatments end as needed. The skin might also peel. To reduce dryness, continue to apply moisturizers to the skin for at least three to four months after treatments.

Fibrosis is a common occurrence. Fibrosis is the formation of scar tissue due to injury or long-term inflammation. It can cause lack of motion and reduced range of motion. Our Omega36™ Super Serum can help with the problem since it offers anti-inflammatory properties and appears to help with pain and movement.

## KEYS TO HELPING YOUR SKIN

- For itching, apply corn starch.  
Lightly towel dry and keep the skin slightly moist.
- Apply moisturizers often. Do not wait for your skin to feel dry.
- Wear a high quality UVA/UVB Broad Spectrum Sunscreen
- Apply moisturizers while your skin is damp. This will trap moisture in the epidermal layer.
- Wear gloves while washing dishes. Wear cotton-lined gloves to do household chores, rubber gloves when using chemicals.
- Apply a petrolatum-based product daily, especially around the nails, fissures and cracked skin on the hands and feet.
- File your nails gently rather than cutting them. **Do not cut, push or touch your cuticles!**
- To avoid dryness, take quick, lukewarm showers or baths. Use one to two cups of baking soda in your bath

## WHAT TO AVOID DURING TREATMENTS (picture)

- **STOP** all retinoids (prescription strength Vitamin A, e.g. Retin-A®, Renova®...)
- **STOP** all Alpha Hydroxy Acid and Beta Hydroxy Acid skin care products containing Glycolic Acid or Salicylic Acid
- **DO NOT USE** products with added fragrance in the ingredients listing. This can include essential oils, which may leave a nice smell but may also create contact dermatitis.
- **BE CAREFUL** of added coloring agents in shampoos and skin care products that can also cause contact dermatitis. This will be noted in the ingredient list as FD&C.
- **DO NOT USE** fabric softeners which can create allergic reactions.
- Extreme temperature changes can be disruptive, especially hot to cold and very dry conditions.
- Swimming can be beneficial but be careful with chlorinated pools, which will dry out the skin's surface. If you can smell the chlorine, stay out.
- **DO NOT FORGET** your sunscreen no matter what the weather might be. You may be photo-sensitive for more than a year once treatments end.
- **STOP** all self tanners
- **DO NOT SHAKE HANDS**
- **STOP** bathing more than once a day
- **STOP** manicures and pedicures
- **STOP** nail biting, fake nails and wraps
- **STOP** pushing back your cuticles
- **STOP** waxing

## HOW TO CARE FOR YOUR SKIN DURING TREATMENTS

Healthier skin improves the lipid system, which in turn improves TEWL (transepidermal water loss) and the protective barrier (Stratum Corneum) within the skin. By minimizing moisture loss you will make the skin smoother, softer and healthier. This is also important for hands and soles of the feet, which can easily become sore, crack and blistered.

We highly recommend gentle to very mild products. Treat the skin as you would a burn. Wash hands using tepid or lukewarm water. Use alcohol-free cleansers including an antibacterial wash before touching areas being treated. Be sure to follow application directions, which vary from product to product. You will also need to keep the skin moist at all times due to the drying effects of the treatments. Wear sun protective apparel and a high quality broad spectrum sunscreen.

**The regimen for proper skin care revolves around a Core Program.**

## Reprev™ recommends three categories to your skin's well-being

### **CLEANSE** (picture)

The best cleanser should be extremely gentle with little to no added fragrance other than a product's natural ingredients. The cleanser can be soap-less (non-foaming) or have very little foam. Foams contain surfactants that can create drying effects on the skin. You should also have an anti-bacterial wash that is alcohol-free and preferably without Triclosan.

Cancer patients and survivors are advised to never scrub their skin. Overzealous cleansing can strip away the remaining natural oils and scar the skin.

### **MOISTURIZE** (picture)

Add moisturizer to all affected areas numerous times daily. It should be light in feel and fragrance-free. You will need to consider various moisturizers, a creme for the face and a lotion for the body.

Severe cracking of the skin and ulcerations need to be dealt with quickly. We recommend ointments with a petrolatum base that can offer an occlusive barrier while also delivering nutrients to the skin.

Bruises can be another problem. A topical that can work on embattled skin and uses Arnica will put you on track for improved results and offer some prophylactic measures to minimize future bruising.

### **PROTECT** (picture)

We know that UVB radiation does not have to create a burn effect on the skin to cause damage. And, it only takes ten minutes for the average skin type to burn without protection.

UVA radiation is more harmful as it creates significant damage by destroying necessary nutrients in the skin. We also know that UVA has one hundred percent (100%) potency from sunrise to sunset, rain or shine, every day of the year.

Since we become more vulnerable to this damage with a reduced immune system, it becomes critical that all cancer patients and survivors wear a significantly effective broad spectrum sunscreen. We have learned over a twenty year period that ingredients such as zinc oxide, titanium dioxide and Parsol 1789 (Avobenzone) are not necessarily the best ingredients to use.

A sunscreen should be elegant, light to the touch, grease-less so that it dries quickly and

works extremely well with make-up. It should not break down when you perspire or go into the water. Most importantly, it should get stronger and last all day long without having to reapply.

Although cancer patients are advised to moisturize with products containing sunscreen it is important to know that you do not want a moisturizer that contains sunscreen; you want a sunscreen that contains moisturizing elements and potent antioxidants like Aloe Vera and pharmaceutical-grade Vitamin E.

Many medications may cause you to react to sunlight (photo-sensitivity.) Be certain to always wear a high quality broad spectrum (UVA & UVB) sunscreen with SPF20 or higher. This should become part of your daily regimen even if you are only going out for ten (10) minutes during the day. We are much more vulnerable to this damage which occurs long term.

## CLEANSER BACICLEANSE™ ANTISEPTIC WASH

### REGULATORY STATUS: OVER THE COUNTER (OTC) DRUG

- **Meets the FDA Monograph for Topical Antimicrobial Drug Products for OTC Human Use.**
- **Meets the FDA Monograph for Class I First Aid Treatment as an Antiseptic Wash.**

### DRUG FACTS

#### PURPOSE

- First Aid Antiseptic
- Antiseptic Wash

#### ACTIVE INGREDIENT: BENZETHONIUM CHLORIDE 0.2%

#### INDICATIONS

- ◆ To promote regular and continuous cleanliness without drying the skin.
- ◆ To kill germs (E.coli, Pseudomonas, and Staph), which cause infection, on contact.
- ◆ To induce improved wound healing by controlling the sterility in open wound sites.

#### KEY FEATURES

- ◆ Bacicleanse™ is manufactured in accordance with Good Manufacturing Practices (GMP) for DRUGS.
- ◆ Bacicleanse™ kills 99.99% of harmful germs, including E.coli, Pseudomonas, and Staph, on contact.
- ◆ Eliminates bacterial contamination
- ◆ Eliminates fungal contamination
- ◆ Broad-spectrum antimicrobial action, encompassing Gram-Negative, Gram-Positive, Fungi, Yeast and Acid Fast Bacteria.
- ◆ Benzethonium Chloride disrupts bacterial growth and forces it to destroy itself.
- ◆ Significantly more effective than Triclosan
- ◆ Maximum strength allowed by the FDA
- ◆ Kill rate will last for two (2) to four (4) hours.
- ◆ A water-soluble formulation improves the permeability of agents into the skin. This action causes improved efficacy to kill bacteria within the skin and to remove debris.
- ◆ Offers immediate sanitation. No waiting for active ingredient to become effective.
- ◆ This cleanser is non-drying.
- ◆ Bacicleanse™ is an alcohol-free product. This offers critical benefits since alcohol-based antiseptic cleansers indicate added risk of potentially flammable solution in a wound site, irritation and long-term drying/cracked skin factors.
- ◆ Leaves no residue or sticky after-effect.
- ◆ Skin conditioning and healing agents leave your skin feeling smooth and soft.
- ◆ Designed for continuous use.
- ◆ Recommended for post-operative care on all skin types.

#### Industry Concerns

*Healthcare Workers: Major obstacles to proper cleansing exist in the workplace. These include time and conditioning of the skin's barrier.* Healthcare workers must use antiseptics for hand-washing, pre-op skin preparation and surgical hand scrubs. The FDA certifies these products as over the counter (OTC) Drugs.

- ◆ Most antiseptic cleansers require at least 10 to 25 seconds for a 99% kill rate. Very seldom do people wash for the required length of time.
- ◆ Poor compliance with hand hygiene is mainly due to dermatitis or hand chapping of healthcare personnel. One agent that causes dermatitis is SLS, which decreases barrier function of the skin.<sup>1</sup>

*Wound Management:* Intact skin is the first line of defense against microbial invasion in the body. The purpose of skin antiseptics is to destroy or remove transient microorganisms.

- ◆ Several bacteria studies have proven that there is a direct correlation between high levels of bacteria in pressure ulcers and the failure to heal. High levels of bacteria are also found in necrotic tissue.

**Medical Uses**

Cleanse between patient treatments.

Use in patient treatments. Washing body parts with an antiseptic agent will result in a dramatic decrease in bacterial loads.

- ◆ Control and minimize infections.  
Use as a surgical cleansing agent to reduce the number of resident flora for the duration of the procedure.  
Helps with acne-prone skin.
- ◆ Many nosocomial surgical wound infections are preventable through proper hand washing and appropriate surgical skin preparations.
- ◆ Antiseptic agents increase the likelihood of killing potentially pathogenic bacteria.

**Patient Uses**

- ◆ Cleanse hands, face and body for normal hygiene.
- ◆ Keep countertops, sinks and bathroom areas spotless and bacteria-free.
- ◆ Cleanse cuts and wounds to eliminate infections.
- ◆ An excellent cleanser during chemotherapy and radiation.

**WARNINGS**

- ◆ External use only.
- ◆ Do not use in eyes.
- ◆ In case of deep wounds or puncture wounds, consult a physician.
- ◆ If irritation develops and persists for more than a few days, discontinue use and consult a physician.
- ◆ Do not leave on skin for more than one minute without rinsing.

**DIRECTIONS**

**Personal Uses**

- ◆ Wet hands and other areas to be treated.
- ◆ Place a small amount of Bacicleanse™ into your hands and work into a light lather.
- ◆ Apply on areas to be treated with gentle, circular motion.
- ◆ Rinse clean.
- ◆ Use as often as necessary.

**Equipment and Counter Uses**

- ◆ Apply to slightly damp sponge or paper towel.
- ◆ Cleanse area lightly but thoroughly.
- ◆ Allow area to dry.
- ◆ Clean as often as needed.

**INGREDIENTS:** Active: Benzethonium Chloride (0.2%)

Other Ingredients: Purified Water, Ammonium Lauryl Sulfate, Disodium Laureth Sulfosuccinate, Ammonium Chloride, Sodium Chloride, Lauric Diethanolamide, Propylene Glycol, Diazolidinyl Urea, Methylparaben, Propylparaben, Citric Acid.

## CLEANSER BENECLEANSE™ ULTRA GENTLE WASH

### REGULATORY STATUS

This is classified as a cosmetic by the FDA

### INDICATIONS

Soap-less cleanser for sensitive, dry and normal skin.

### KEY FEATURES

- ◆ Extremely mild cleansing lotion.
- ◆ May be used on most skin types, including skin being irradiated and chemotherapy during cancer treatments.
- ◆ Can be used with or without water.
- ◆ Can remove most makeup, even around the eyes.
- ◆ Use for pre- and post-op care
- ◆ Contains no harsh ingredients irritants
- ◆ Minor foaming action.

### DIRECTIONS

- ◆ Regular daily use:
- ◆ Apply a liberal amount to skin surface.
- ◆ Massage gently to liquefy and remove dirt and other impurities.
- ◆ Rinse thoroughly with tepid water and pat dry.
- ◆ Without water: remove gently with tissue.

### CAUTION

- ◆ For external use only.
- ◆ Avoid contact with eyes.
- ◆ Keep out of reach of small children.
- ◆ If irritation develops, discontinue use.

**INGREDIENTS:** Purified Water, Propylene Glycol, Cetyl/Stearyl Alcohol, Sodium Lauryl Sulfate, Diazolidinyl Urea, Triethanolamine, Carbomer, Propylparaben, Citric Acid.

### SKIN TYPE / TREATMENT USE RATE

Skin Types	Sensitive	Dry / Mature	Normal	Combination	Oily	Acne
Usage	Yes	Yes	Yes	Yes	Discretion	Discretion
Face	One pea size drop per application for the face. Twice daily = 60 days for the 8-ounce bottle.

## CLEANSER

## VITOX™ ANTIOXIDANT WASH

**REGULATORY STATUS:** This is classified as a cosmetic by the FDA

### INDICATIONS

- ◆ To cleanse with a non-irritating wash.
- ◆ Calms the skin while adding nutrients.

### KEY FEATURES

- ◆ Contains multi-fruit acids to offer minor exfoliation without irritation.
- ◆ Effective free radical fighting antioxidants including Ascorbic Acid, Kola Nut, and Japanese Green Tea extracts that fight oxidation on the skin.
- ◆ Light foaming activity.
- ◆ Leaves the skin feeling soft, smooth and refreshed.

### DIRECTIONS

- ◆ Wet face with tepid water.
- ◆ Apply liberally to face.
- ◆ Massage gently.
- ◆ Rinse and pat dry.
- ◆ Use 2 - 3 times daily.

### CAUTION

- ◆ Keep out of eyes.
- ◆ Keep away from small children.
- ◆ If irritation develops, discontinue use.
- ◆ For topical use only.

**INGREDIENTS:** Water , Aloe Vera, Ammonium Lauryl Sulfate, Cocamide DEA, Hydroxypropyl Methylcellulose, Amidroxy Grapefruit Extract, Amidroxy Sugar Cane Extract, Algae Extract, Japanese Green Tea Extract, Propylene Glycol, Kola Nut Extract, Triethanolamine, Diazolidinyl Urea, Fragrance, Methylparaben, Ascorbic Acid (Vitamin C), Hydrolyzed Glycosaminoglycans, Propylparaben, Phenoxyethanol.

## MOISTURIZER / SUPER NUTRIENT

## OMEGA36<sup>®</sup> SUPER SERUM FACE AND BODY

### REGULATORY STATUS

The FDA classifies this product as a cosmetic.

Special Note: This product contains 2% Dimethicone, which is an OTC drug as a skin protectant. However, due to the very unusual characteristics of Emu Oil, it completely envelops the Dimethicone so that it cannot be traced. Therefore, we do not make the claim.

### INDICATIONS

- ◆ Highly potent hydrator to improve moisture loss on the skin.
- ◆ To protect the skin from further moisture loss.
- ◆ Improves the body's normal healing process.

### KEY FEATURES

- ◆ Helps prevent and temporarily protects chafed, chapped, cracked, and windburned skin and lips\*. Topical moisturizer may be used on all skin types.
- ◆ Enhances the transport of bioactive compounds into the skin.
- ◆ Highly purified Emu oil (94%) and Vitamin E (4%).
- ◆ Enhances the body's ability to heal.
- ◆ Anti-inflammatory.
- ◆ Antibacterial.
- ◆ \*NOTE - Emu oil has a natural scent.
- ◆ 99% (+/- 1%) Triglyceride = completely neutral lipid.
- ◆ Lab testing with induced arthritis bacteria showed minimal swelling and inflammation. High levels of linolenic acid are known to ease joint pain. High levels of oleic acid possess anti-inflammatory effect on dermal tissue.
- ◆ Emu oil lacks Phospholipids thereby allowing high penetrating properties and total reception into the skin.
- ◆ 100% absorption into the skin that will last for days.
- ◆ Emu oil lacks Phospholipids thereby allowing high penetrating properties and total reception into the skin.
- ◆ Fortified with Vitamin E Oil (d-L Alpha Tocopherol Acetate) which is medically proven as an antioxidant.
- ◆ Deep penetrating.
- ◆ Works on all skin types and many conditions.
- ◆ Appears to keep keloids (over thickened, beyond the margin) scars
- ◆ Eye and ingestion sensitivity tested.
- ◆ Hypoallergenic.
- ◆ Non-comedogenic.
- ◆ Natural emollient.
- ◆ 70% unsaturated fatty acids. Contains key essential fatty acids; Oleic (19%), Linoleic (52% Omega 3 and Omega 6) and Alpha Linolenic (1%).

### Physician Usage

- ◆ May be used for pre- and post- surgical procedures, including peels, tattoo removal and for pre- and post-cancer radiation treatment at physician's discretion.
  - ◆ Skin is kept moist and promotes healing from below and above the surface.
  - ◆ Keep scabs from forming by accelerating the healing process.
  - ◆ Reduces healing time by approximately 50%.
  - ◆ Reduces and may eliminate blistering.
  - ◆ Will eliminate itching and discomfort for patient.
  - ◆ Reduces swelling and inflammation.
  - ◆ Keloids - reduces recent scarring and has anti-inflammatory action against the formation of keloid tissues.

### Symptoms appear to show improvement:

- |                         |                    |            |
|-------------------------|--------------------|------------|
| ▪ Muscle and Joint Pain | ▪ Eczema           | ▪ Mastitis |
| ▪ Rosacea               | ▪ Radiation Burns* | ▪ Shingles |
| ▪ Psoriasis             | ▪ Carpal Tunnel    | ▪ Bruising |

- Post-op Breast Implants

**\*Not to be used on radiation burns until treatments have ended.**

**Wound Healing**

- Epithelial Tissue - reduces scar tissue formation and anti-inflammatory action soothes wound after surgery.
- Bed sores.

**Patient Usage**

**Common symptoms**

- |  |  |  |
|--|--|--|
| <ul style="list-style-type: none"> <li>Dryness</li> <li>Chafing</li> <li>Swelling</li> <li>Inflammation</li> <li>Irritation</li> </ul> | <ul style="list-style-type: none"> <li>Gum disorders</li> <li>Rash</li> <li>Sunburn</li> <li>Peeling</li> <li>Irritations</li> </ul> | <ul style="list-style-type: none"> <li>Blisters</li> <li>Eye puffiness</li> <li>Hemorrhoids</li> <li>Blisters</li> <li>Cuts</li> </ul> |
|--|--|--|

**Body pain**

- |                          |               |                |
|--------------------------|---------------|----------------|
| Arthritis and rheumatism | Body soreness | Muscle bruises |
|--------------------------|---------------|----------------|

**DIRECTIONS**

- Shake well.
- Apply liberally as often as necessary.
- May be used on all skin types.

**General Use**

Shake well. Apply small amount as often as needed. Massage gently in to all areas. Will begin to soak in within minutes. Should completely soak in within 20-25 minutes or you have applied too much. May feel slightly greasy to the touch; this will go away.

**Medical Use:**

Keep area moist at all times. Apply as often as necessary.

**CAUTION**

- For external use only.**
- Keep away from small children.
- If condition worsens or does not improve within 7 days, consult a doctor.
- Not to be applied over deep or puncture wounds, infections, or lacerations.

Do not put fabric over serum until it is absorbed.

**Bath** - Be careful when standing. Tub will be slick.

**INGREDIENTS:** Purified Emu Oil, Vitamin E Oil (d-I Alpha Tocopherol acetate), Dimethicone, BHT (antioxidant), and TBHQ (antioxidant).

- BHT: Butylated Hydroxytoluene:** Antioxidant and preservative. White to slightly yellow waxy solid with a faint characteristic odor. Can cause allergic reactions but only in high doses.
- Dimethicone:** *Dimethicone Copolyol – A silicone oil, white, viscous, used as an ointment base ingredient, as a topical drug vehicle, and as a skin protectant. The FDA has classified as an OTC Drug at 2% concentration with very low toxicity. This product does contain 2% in its formulation.*
- Emu Oil (purified):** A lipid with tremendous bioactive transport capabilities. Harvested animal fat from an Emu. Recognized by Australia’s Regulatory Commission (TGR) as an active ingredient and an active substance to heal the skin. Offered in both Pharmaceutical (99.9% pure) Grade. Critical issue of quality in food or Cosmetic grade and how fat is processed and rendered which tends to vary dramatically.

- **TBHQ:** *Antioxidant.*
- **Vitamin E Oil (d-I Alpha Tocopherol Acetate):** Pharmaceutical grade, synthetic form of Vitamin E. A powerful antioxidant with synergistic qualities. Helps to moisturize and fights free radical damage in surrounding tissue. Offers 1,100 I.U. of Vitamin E to the skin.

**SKIN TYPE / TREATMENT USE RATE**

SKIN TYPE	Sensitive	Dry / Mature	Normal	Combination	Oily	Acne
Usage	Yes	Yes	Yes	Yes	Yes	Yes
Face & Body	Supply lasts depending on frequency of usage.					

This product can be used for, but not limited to, Psoriasis, Eczema, Rosacea, post-laser resurfacing, pre- and post-surgical treatments, burns, cuts, etc. All skin types may use this product.

## MOISTURIZER / NUTRIENT OMEGA36™ SUPER SERUM FACE AND BODY PROTOCOL

**WARNING: This product is so potent that it will stop radiation burn. DO NOT USE THIS FOLLOWING RADIATION TREATMENT. It will defeat the purpose of the radiation. Wait until treatments are complete to help the skin improve and heal again.**

It can be used on areas of the body that have not been irradiated.

### **Pre-op:**

We recommend usage at bedtime for 7 days prior to a surgical procedure.

### **Post-op:**

**Immediately** following the procedure we recommend continued usage of E2 Serum. We do not desire a “protective” shield of petrolatum or any other barrier on the skin since they do not allow oxygen to penetrate and assist the healing process.

Omega36™ Super Serum will offer comfort to the patient and allows the skin to breathe. It also offers extensive moisturizing capabilities, reduces inflammation, minimizes irritation and will keep the skin from scabbing and blistering. This speeds up the healing process and optimizes the patient’s downtime.

Standard soaks, i.e., vinegar, should be utilized as normally recommended.

The patient should apply the serum as often as needed, especially in the first 2-3 days following a procedure. We want the skin to remain moist.

**At one full week** continue using the Serum at bedtime. The patient may only need a few drops to satisfy their needs. Women should be able to apply makeup. For daytime usage, we recommend Omega36™ Hydration Creme under their makeup. This 20% base of Emu Oil along with Vitamin E (USP) will continue to heal the skin and minimize any irritation from the makeup. It will dry within 1 minute and allow makeup to go on evenly. MEN: Excellent after-shave balm.

The serum is excellent on scars and will dramatically improve their appearance. We highly recommend this as soon as the sutures are removed.

**WARNING:** Do not apply directly onto sutures until day 4 or 5 post-op. This product will loosen sutures in days 1 - 3. Excellent for use on sutures 2-3 days prior to being removed to help any discomfort and to allow easier removal.

## MOISTURIZER / SUPER NUTRIENTS OMEGA36<sup>®</sup> HYDRATING CREME FACIAL MOISTURIZING CREME

### REGULATORY STATUS

The FDA classifies this product as a cosmetic since there is no monograph for Emu Oil. However, we

Special Note: This product contains 2% Dimethicone, which is an OTC drug as a skin protectant. However, due to the very unusual characteristics of Emu Oil, it completely envelops the Dimethicone so that it cannot be traced. Therefore, we do not make the OTC Drug claim of 'Skin Protectant'.

### INDICATIONS

- ◆ To nourish dry, chafed skin.
- ◆ To offer long-lasting and penetrating moisturizing capabilities.
- ◆ To improve moisture loss in the skin.
- ◆ To protect the skin from further moisture loss.
- ◆ Improves the body's normal healing process.

### BENEFITS

- ◆ Offers healing and soothing properties to work during your normal daily routine.
- ◆ Works extremely well under makeup.
- ◆ To eliminate pruritic conditions that may exist following a procedure,
- ◆ Enhanced with purified Emu Oil, which has tremendous capabilities including the transport of bioactive compounds into the skin and the acceleration of skin healing properties.

### KEY FEATURES

- ◆ Extremely mild on the skin.
- ◆ Penetrates the epidermis.
- ◆ Absorbed rapidly into the skin.
- ◆ Highly effective moisturizing capability.
- ◆ Skin remains moist 3-4 times longer than traditional moisturizers.
- ◆ Leaves skin smooth and soft for days.
- ◆ Sheer, lightweight body cream.
- ◆ Grease-less
- ◆ Fragrance-free.
- ◆ Use day or night.
- ◆ Can use with makeup.
- ◆ Helps to heal the skin.
- ◆ Appears to help with inflammation.
- ◆ Great after shaving.
- ◆ May be used around the eyes.
- ◆ Post-op Microdermabrasion treatment.

### DIRECTIONS

#### **Facial Usage:**

- ◆ Cleanse face with a mild cleanser.
- ◆ Gently and evenly apply a small amount onto the skin.
- ◆ Allow to dry for 2 minutes before applying makeup. If your skin is not dry in this period of time, you have applied too much. Dab off excess with a tissue.
- ◆ Use as often as needed.

#### **Body Usage:**

- ◆ Apply any time, as often as needed.

### CAUTION

- **For external use only.**
- Avoid contact with eyes.
- Keep away from small children.
- If condition worsens or does not improve within 7 days, consult a doctor.
- Not to be applied over deep or puncture wounds, infections, or lacerations.

**INGREDIENTS:** Aloe Vera, Purified Emu Oil, Dimethicone, Stearic Acid, Polyacrylamide./C13-14 Isoparaffin, Laureth-7, Propylene Glycol, dl-Alpha Tocopheryl Acetate, Diazolidinyl Urea, PEG-4L, Methylparaben, Propylparaben, Polyethylene Glycol, 3-Iodo-2-Propynylbutylcarbamate, and TBHQ (antioxidant).

## MOISTURIZERS / NUTRIENTS

### OMEGA36™ HAND & BODY LOTION

BODY MOISTURIZING LOTION

### REGULATORY STATUS

The FDA classifies this product as a cosmetic since there is no monograph for Emu Oil. However, we

### INDICATIONS

- ◆ Offers soothing relief from minor scrapes, chafed and severely dry skin.
- ◆ Will significantly help rough, cracked and flaking skin.
- ◆ Excellent on sensitive and irritated skin

### KEY FEATURES

- ◆ Enhanced with purified Emu Oil, which has tremendous capabilities including the transport of bio-active compounds into the skin and the acceleration of skin healing properties.
- ◆ Grease-less.
- ◆ Extremely mild on the skin.
- ◆ Penetrates the epidermis.
- ◆ Absorbed rapidly into the skin.
- ◆ Highly effective moisturizing capability.
- ◆ Skin remains moist longer than with traditional moisturizers.
- ◆ Small amount needed to fulfill your needs.
- ◆ 5% Emu Oil as its base.
- ◆ Aloe Vera Concentrate helps to soothe and heal the skin.
- ◆ Aloe Vera Concentrate is highly purified and 200 times the strength of Aloe Vera Gel.
- ◆ Glycerin is a highly potent humectant to offer excellent moisture drawing capabilities.
- ◆ Leaves skin smooth and soft for days.
- ◆ Sheer, lightweight body lotion.
- ◆ Use on hands, feet and entire body.
- ◆ Excellent for massages.
- ◆ Fragrance-free.
- ◆ Use day or night.
- ◆ Helps to heal the skin.
- ◆ Reduces inflammation and irritation.
- ◆ Great after shaving legs.
- ◆ May be used around the eyes.
- ◆ Excellent preventative before braving the elements.

## DIRECTIONS

### General:

- ◆ Shake well prior to usage.
- ◆ Apply thinly and evenly.

### Body Usage:

- ◆ Apply any time, as needed.
- ◆ Prior to a massage, heat in a microwave for 40 seconds (full bottle).
- ◆ After a shower, apply after toweling.
- ◆ After shaving, apply immediately.
- ◆ Use prior to going outdoors during inclement conditions.

## CAUTION

- ◆ External Use Only.
- ◆ Keep out of reach from small children.
- ◆ Avoid direct contact with the eyes.
- ◆ If irritation develops, discontinue use.
- ◆ We recommend that you contact a dermatologist before using this item on diseases of the skin.

**INGREDIENTS:** Aloe Vera, Dioctyl Adipate, Purified Emu Oil, Dimethicone, Polyacrylamide, Lyreth-7, Propylene Glycol, Benzyl Alcohol, Glycerine, C13-14 Isoparaffin, Diazolidinyl Urea, Vitamin E Acetate, Methylparaben, Propylparaben and TBHQ (Antioxidant).

## MOISTURIZER OMEGA36<sup>®</sup> BRUISE CREME

Of the many insults of aging, one of the most visible is the increased tendency toward unsightly bruising

### REGULATORY STATUS

The FDA classifies this product as a cosmetic.

### INDICATIONS

- ◆ To assist the healing process from skin bruising.
- ◆ To condition and improve the appearance of skin that does not heal well or bruises easily.
- ◆ To help improve common skin disorders including telangiectasis and varicosity's on the face.
- ◆ Excellent prophylactic for bruising.

### KEY FEATURES

- ◆ Excellent for pre- and post-op treatment.
- ◆ Unique delivery system combining Emu Oil, Vitamin E (USP), Arnica.
- ◆ More effective than Vitamin K.
- ◆ Deep penetrating capabilities.
- ◆ High levels of Arnica Montana. Known for its calming, soothing, hyper-anemic healing and anti-phlogistic properties. It also activates blood flow to the skin.
- ◆ Emu Oil has tremendous moisturizing capabilities. It is also a transport of bioactive elements into the skin and appears to accelerate the body's ability to heal itself. It is listed by the Australian TGR (Therapeutic Goods Register), a government agency comparable to our FDA, as an active ingredient and an active substance.
- ◆ Emu Oil contains Oleic, Linoleic and Linolenic essential fatty acids to nourish the skin. Gamma-Linolenic acid, an essential fatty acid, enhances the skin's barrier protective system.
- ◆ Vitamin E (USP) is a well known healing agent and antioxidant.
- ◆ Helps to heal existing damage and protect the skin from further damage.
- ◆ Superior emollient.
- ◆ Grease-less.
- ◆ Non-toxic.
- ◆ Elegant feel.
- ◆ Excellent stability.
- ◆ Fragrance-free.

### WOUNDS & WOUND HEALING:

This is a fast-acting, non-toxic, system that penetrates the epidermis with highly proven ingredients, some of which have been used for hundreds to thousands of years with significant benefits.

OMEGA36<sup>™</sup> Bruise Creme is the premium product in this field for a number of reasons. It performs faster than any other product for bruising. We utilize 2 key ingredients that are clinically known to promote wound healing. Arnica has long been prized for its wound healing capabilities, including improved circulation and anti-inflammatory qualities. Emu Oil brings thousands of years of known benefits, which include superior moisturizing capabilities and an ability to accelerate the healing process. It is also a carrier of bioactive ingredients into the skin. The addition of the major antioxidant Vitamin E fuels a synergistic effect to the formulation along with antioxidant activity to fight the free radical damage that occurs at the site and to the surrounding tissue. We also utilize highly substantive essential fatty acids, which help to protect the skin.

This unique blend offers extremely high stability, a luxurious feel and excellent properties that nourish, protect and offer assistance in healing the skin from wounds.

Vitamin K based products claim to promote stronger blood vessels. Blood vessels are only a part of the problem that needs to be addressed. More importantly, Vitamin K is typically the last item on the ingredient list other than preservatives; thereby offering little help while it is needed the most. It is typically sold at 1% and 2% concentrations. The Vitamin K product that works best is at 5%, which is only available as a prescription drug.

### DIRECTIONS:

- ◆ **Do not use on broken or abraded skin.** Arnica will irritate broken or abraded tissue. We recommend Benesal<sup>®</sup> ointment when this condition exists.

**Bruising:** Use as soon as possible following trauma. Cleanse affected area and leave slightly damp. Massage (do not rub) creme lightly into the skin with fingertips. May be used around the eyes. Wash hands following use. Apply to affected area(s) twice daily.

**Spider Veins (facial):** Same as above. Apply directly to skin before any other facial products.

**Cosmetic Surgery:** Use pre- and post-op under the direction of a physician. Do not apply directly to sutures.

**Prophylactic and Pre-op Use:** Use twice daily to help condition the skin. Use the creme at least 2 weeks prior to a procedure or activity to minimize and prevent further bruising. Although we cannot guarantee that some bruising will not occur, we know that this formulation will offer significant assistance.

**Post-op Use:** An excellent vehicle to treat common bruising following surgery. Use twice daily. You may use this in conjunction with our OMEGA36 SUPER SERUM for added benefits, which includes minimizing possible scarring.

**Medical Procedures and Skin Disorders that will show dramatic improvement include but are not limited to:**

- ◆ Blepharoplasty (eyelid tuck)
- ◆ Rhytidectomy (facelift)
- ◆ Rhinoplasty (nasal reconstruction)
- ◆ Sclerotherapy (spider veins, facial)
- ◆ Tumescent Liposuction (fat removal)
- ◆ Telangiectasis (dilation of capillaries)
- ◆ Varicose tissue (broken capillaries)
- ◆ Diabetes

This is also an excellent prophylactic vehicle for diabetics and any patient that must take daily injections or is hooked up to an intravenous drip. This will also help improve a black eye.

## CAUTION

- ◆ For topical use only.
- ◆ Avoid contact with eyes and mucous membranes.
- ◆ Keep away from small children.
- ◆ If irritation develops, discontinue use.
- ◆ Store at room temperature.
- ◆ Do not expose to excessive heat.

**INGREDIENTS:** Deionized Water, Arnica Montana Oil, PEG-100 Stearate, Emu Oil, Tocopheryl Acetate (USP), Mineral Oil, Propylene Glycol, Cetyl Alcohol, Hybrid Sunflower Oil, Stearic Acid, Borageamidopropyl Phosphatidyl PG-Dimonium Chloride, Cyclomethicone, Japanese Green Tea Extract, Triethanolamine, Diazolidinyl Urea, Methylparaben, Propylparaben.

This unique blend offers extremely high stability, a luxurious feel and excellent properties. E2 Bruise Creme will nourish, protect and offer assistance in healing the skin from wounds.

- **Deionized Water:** Base.
- **Arnica Montana Oil:** *Arnica Montana L.* has been used in Europe since the 16<sup>th</sup> century. European physicians prescribed it as a stimulant, particularly for the heart and circulation. In 1565, a Swiss naturalist named Konrad von Gesner tested arnica by taking a dose himself. Then he wrote to a friend declaring that there had been no ill effect. Less than an hour later, Gesner was dead, presumably of arnica poisoning. Not only can overdoses of an extract from the plant cause painful irritation of the stomach and intestines, but also arnica is also toxic to the heart and causes increase in blood pressure. Arnica, in infinitesimally tiny doses, is to this day the standard homeopathic remedy for shock occasioned by a sudden painful injury. But the only safe use for arnica extract is an ingredient in salves and liniments for bruises and sprains. Experienced persons with extreme caution must administer these preparations. North American Indians used a related species with similar medicinal properties, *A. fulgens*, externally on wounds and sore muscles. Do not use internally. Uses: chief medicinal virtue lies in its ability to reduce pain and swelling when made into salves or liniments. Arnica Montana was listed in the U.S. Pharmacopoeia for such use from the early 1800s to 1960. Today Arnica is cultivated as a garden flower.
- **PEG-100 Stearate:** Emulsifier.
- **Emu Oil:** A lipid with tremendous bioactive transport capabilities. Recognized by Australia's Regulatory Commission (TGR) as an active ingredient and an active substance to heal the skin.

- **Tocopheryl Acetate USP:** Pharmaceutical grade Vitamin E. A powerful antioxidant with synergistic qualities. Helps to moisturize and fights free radical damage in surrounding tissue.
- **Mineral Oil:** Emollient to soften the skin.
- **Propylene Glycol:** helps to bind water better than glycerin, thickening agent.
- **Cetyl Alcohol:** emulsion stabilizer
- **Hybrid Sunflower Oil:** High levels of oleic acid create a superior emollient with an elegant feel.
- **Stearic Acid:** Pearlizing agent.
- **Borageamidopropyl Phosphatidyl PG-Dimonium Chloride:** a gamma linoleic acid that enhances barrier protection on the skin. Counter-irritant.
- **Cyclomethicone:** A lubricant and waterproofing agent.
- **Japanese Green Tea Extract:** A powerful antioxidant to fight free radical damage.
- **Triethanolamine:** Emulsifier.
- **Diazolidinyl Urea:** Preservative.
- **Methylparaben:** Preservative.
- **Propylparaben:** Preservative.

## MOISTURIZER / CRACKED SKIN BENESAL™ OINTMENT EMOLLIENT FOR SEVERELY CRACKED SKIN

### REGULATORY STATUS

The FDA classifies this product as a cosmetic since there is no monograph for Emu Oil.

### BACKGROUND

Originally, it was thought that Vitamin E in a specific ratio with Salicylic Acid would produce both antioxidant and Keratoplastic activity. Theoretically, this would create an increase in fibroblastic motility thereby creating a faster, more pronounced proliferation of new epithelial cells, as well as spurring a more rapid production of tropo-collagen. This is now a proven entity.

More importantly, in the presence of this compound an additional finding was the *in situ* increase in endogenous zinc in the wound. Zinc, of course, is a well-known healing agent.

### INDICATIONS

- ◆ To create a semi-occlusive coating to allow the skin to respire, preventing further maceration while resisting exogenous infiltrates.
- ◆ To afford significant healing levels in a controlled release mechanism with the ability to suspend, and then deliver, actives to cracks, fissures and denuded skin.
- ◆ To improve wound healing in decubitus ulcers.

### KEY FEATURES

- ◆ Extremely soothing on the skin.
- ◆ Contains key ingredients that work synergistically.
- ◆ Patented process.
- ◆ Semi-occlusive wound dressing to allow skin respiration.
- ◆ Prevents further maceration.
- ◆ Alleviates pain, erythema, and pruritis.
- ◆ Ameliorates the healing process.
- ◆ Excellent on first- and second-degree burns and abrasions.
- ◆ Recommended for Eczema patients
- ◆ Helps soften dry scaly skin patches.
- ◆ Treats fissured and callus skin.
- ◆ Product has been effectively used in hospital and nursing care facilities since 1965 to treat and prevent decubitus ulcers.
- ◆ Utilizes insecticide-free Anhydrous Lanolin.
- ◆ Contains Peruvian Balsam.
- ◆ Chapped lips & chapped nose.

### DIRECTIONS

- ◆ Cleanse area then blot dry. Apply a thin layer of Veradex-E® Ointment as often as necessary.
- ◆ Keep injured area filled with Veradex-E® until healing is complete.
- ◆ Cover area with bandage or gauze to protect clothes from staining.

### CAUTION

- Use as often as necessary.
- Keep out of eyes. Keep away from small children.

**INGREDIENTS:** A specially prepared base of Petrolatum and Anhydrous Lanolin, d-I Alpha Tocopherol Acetate USP, Cetyl Esters Wax NF, Benzyl Cinnamate, Aldehyde C16, and Salicylic Acid USP.

**SKIN TYPE / Treatment Use Rate**

SKIN TYPE	Sensitive	Dry / Mature	Normal	Combination	Oily	Acne

## FACE MASK VITOX™ GREEN TEA MASK

### REGULATORY STATUS

The FDA classifies this product as a cosmetic

### INDICATIONS

- ◆ To re-hydrate the skin.
- ◆ To nourish the skin with vitamins.
- ◆ To deliver antioxidants into the skin.
- ◆ To fight free radical damage from ultra violet radiation with potent antioxidants.

### KEY FEATURES

- ◆ A rich moisturizing mask with a base of nutritional ingredients.
- ◆ Superb lubricants for the skin without leaving a greasy, oily residue.
- ◆ Richly satisfying and natural Japanese Green Tree and Peppermint delivers a calming and cooling effect with an antibacterial agent.
- ◆ Highly potent antioxidants proven to fight free radical damage.
- ◆ Clinically tested.
- ◆ Calming on the skin.

### DIRECTIONS

- ◆ Stir product as slight separation may occur.
- ◆ Cleanse the area(s) to be treated.
- ◆ Allow to dry for two minutes.
- ◆ Apply a moderately-thick layer to the face avoiding contact with eyes.
- ◆ Allow the product to hydrate the skin as it dries.
- ◆ You may remove the mask once it becomes dry.
- ◆ Rinse with plenty of warm water and a soft cloth or gauze. Repeat as often as desired.

### CAUTION

- ◆ **For external use only.**
- ◆ Keep out of reach of children.
- ◆ Do not leave on overnight.
- ◆ May stain light-colored fabrics.

**INGREDIENTS:** Purified Water, Purified Emu Oil, Kaolin, Japanese Green Tea Extract (in Glycerine), Titanium Dioxide, Dimethicone, Stearic Acid, (Polyacrylamide (and) C13-14 Isoparaffin (and) Laureth-7), Peppermint Leaf Powder, Propylene Glycol, Benzyl Alcohol, Cetyl Alcohol, Glycerine, Laureth-7, Tocopherol Acetate, Apple Fiber Powder, 3-Iodo-2-Propynylbutylcarbamate, Diazolidinyl Urea, Chamomile Roman Essential Oil, Palmarosa Essential Oil, Methylparaben, Propylparaben, Aloe Vera Concentrate, TBHQ, Co-Enzyme Q-10.

- ◆ Aloe Vera Concentrate: skin conditioning agent, humectant / moisturizer
- ◆ Apple Fiber Powder: binder, emulsion stabilizer
- ◆ Benzyl Alcohol: serves as a preservative, solvent and viscosity degreasing agent
- ◆ Chamomile Roman Essential Oil: fragrance
- ◆ Co-Enzyme Q-10: antioxidant that inhibits cell peroxidation, skin-conditioning agent
- ◆ Diazolidinyl Urea: preservative, substituted form of Urea
- ◆ Dimethicone: skin conditioning agent, actually meets FDA criteria as a skin protectant but cannot be detected due to the abnormal absorption and cloaking created by Emu Oil

- ◆ Emu Oil: Superb moisturizer and accelerates the healing process in the skin, non-comedogenic
- ◆ Fragrance: used to create the essence of 'creme'
- ◆ Glycerine: humectant, skin conditioning agent, viscosity degreasing agent
- ◆ Iron Oxide: colorant
- ◆ Japanese Green Tea Extract (in Glycerine): antioxidant
- ◆ Kaolin: absorbent anti-caking agent, creates opacity
- ◆ Laureth-7: surfactant, cleansing agent
- ◆ Methylparaben: preservative
- ◆ Palmarosa Essential Oil: fragrance
- ◆ Polyacrylamide (and) C13-14 Isoparaffin (and) Laureth-7: special blend for binding water and to maintain a bright, white cream
- ◆ Propylene Glycol: humectant and skin conditioning agent
- ◆ Propylparaben: preservative
- ◆ Stearic Acid: emulsifying agent
- ◆ TBHQ: antioxidant
- ◆ Titanium Dioxide: colorant and opacifying agent
- ◆ Tocopherol Acetate: antioxidant and skin-conditioning agent
- ◆ 3-Iodo-2-Propynlbutylcarbamate: preservative

## SUNSCREEN SPECTRAL™ SPF20 LOTION

### REGULATORY STATUS

THE FDA CLASSIFIES THIS AS AN OVER THE COUNTER (OTC) DRUG

### DRUG FACTS

#### PURPOSE

Spectral™ SPF20, manufactured with the Pro-Spectrum process is a high sun protection sunscreen that provides superior broad spectrum protection UVA / UVB against sunburn and tanning. It retains a SPF of 20 even after 80 minutes of activity in water or when perspiring.

**ACTIVE INGREDIENTS:** Octinoxate (7.5%), Octisalate (5%), Meradimate (5%) and Oxybenzone (3%)

#### INDICATIONS

- ◆ Helps prevent premature aging and wrinkling of the skin, as well as skin cancers from overexposure to the sun.
- ◆ Provides 20 times your natural protection against sunburn (UVB).

#### KEY FEATURES

- ◆ Independent lab test results clearly prove that Spectral® SPF20 offers superior protection for the prevention of premature aging of the skin and increased risk of skin cancer due to overexposure to the sun. The tests also prove that we offer extremely high protection **over the entire UVC, UVB & UVA spectrums.**
- ◆ Broad-spectrum protection against UVA, UVB and UVC rays.
- ◆ Higher, more consistent level of protection for UVB; and UVA radiation than Zinc Oxide, Titanium Dioxide and Parsol 1789, the 'industry standards'.
- ◆ Higher protection levels compared to sunscreens at SPF30 to SPF60
- ◆ Fortified with Aloe Vera to heal, calm and protect the skin.
- ◆ Fortified with Vitamin E (Alpha Tocopherol Acetate) a powerful and medically proven antioxidant to nourish and protect the skin.
- ◆ Grease-less, leaving you comfortable in all types of weather.
- ◆ Fragrance-free contains no perfumes, which ensure its mildness to the skin.
- ◆ Parabens-free.
- ◆ Non-comedogenic. Contains no chemicals, which are known to cause the formation of plugs in the pores of the skin.
- ◆ Waterproof without the use of any skin sealing films or oils, which have been found to cause an increase in skin temperature.
- ◆ For maximum results, apply at least 20 minutes prior to going into the sun.
- ◆ Water-proof. You do not need to reapply even after heavy perspiration or swimming even though the FDA requires that we tell you to reapply anytime you get out of the water or perspire.
- ◆ Rub-proof. One application lasts 24 hours. Resists removal by light toweling.
- ◆ Developed for cancer patients and to be worn under makeup.
- ◆ Exceeds FDA's maximum requirements for UVA, UVB broad-spectrum waterproof sunscreen.
- ◆ Allow to dry 3-5 minutes prior to adding makeup. You will not need a moisturizer.
- ◆ Parabens-free
- ◆ Fragrance-free

**INGREDIENTS:** Active: Octinoxate (7.5%), Octisalate (5%), Meradimate (5%) and Oxybenzone (3%).  
Other: Aloe Vera, Benzyl Alcohol, Carbopol, Cetyl Alcohol, Cetyl Dimethicone, DEA Cetyl Phosphate, Diazolidinyl Urea, Iodopropynyl Butylcarbamate, Stearic Acid, Talc, Triethanolamine, Vitamin E, Water.

**WARNINGS**

- ◆ For external use only.
- ◆ Keep out of reach of small children. Do not use on children under 6 months of age without advice of a dermatologist.
- ◆ Avoid contact with eyes and mucous membranes
- ◆ Do not use this product if sensitive to any ingredients or their related compounds.
- ◆ Stop use and see a doctor if irritation develops and persists for more than a few days.

**DIRECTIONS**

**Daily usage, year round:**

- ◆ Apply at least 20 minutes prior to going outdoors for maximum activation.
- ◆ Apply to dry skin, avoiding the eyes.
- ◆ Smooth evenly and liberally on all exposed areas. Do not forget your ears, behind your ears, nose, bald spot(s), tops and bottoms of your feet and between the toes.
- ◆ For maximum protection, reapply often, especially after exercise or being in the water.
- ◆ Allow to dry 3-5 minutes prior to adding makeup. You will not need a moisturizer.
- ◆ For maximum protection, reapply often, especially after exercise or being in the water.

**OTHER INFORMATION**

- ◆ Octinoxate can stain light-colored natural fabrics. Proper laundry care: wash cold, then normal care. Dry at a low setting.

**SKIN TYPE / Treatment Use Rate**
