

## **BOTANIST CLEANING & SCRATCH REMOVAL INSTRUCTIONS**

### ***How do I maintain my Powder Coated Metal Furniture and Home Accessories ?***

Maintaining that great powder coated look is easy. Using a neutral detergent, just wash the coating down with soapy water and rinse off with clean water. Regular washing every 6 months under normal conditions, and more often in more severe marine and industrial applications will keep your powder coating job looking like new. Do not use harsh abrasives or chemical degreasers.

*“delivering experiences  
that evoke emotion and  
deliver meaning”*

### ***How do I remove mild scratches and marks from my Powder Coated Products ?***

In the same manner that you would remove mild scratches and markings from any automotive finish. The recommended process is to use a mild buffing solution or wax compound.

These can be found online at places like [www.autozone.com](http://www.autozone.com) or [www.pepboys.com](http://www.pepboys.com).

### ***For Scratch Removal We recommend:***

The Ultimate Car Scratch Remover System - Available on Amazon.com for \$79.95

### ***For Polishing Only We recommend:***

Meguiar's Classic Wash & Wax Kit - Available on Amazon.com for \$27.14
