

LIFT'N BUDDY

The New Movement in Powered Lifts

Powered Lift Capability...2-Wheel Truck Simplicity

Introducing Lift'n Buddy™

Lift'n Buddy Elevating 2-wheel trucks make transporting and lifting items faster, safer and easier in just about any work environment. They combine the vertical lifting capabilities of a small powered stacker with the convenience, versatility and simplicity of a 2-wheel hand truck.

How it Works

At the touch of a button Lift'n Buddy's powered, adjustable height platform positions loads at a comfortable height to eliminate bending and stretching when loading, unloading or moving items from one level to another. A linear actuator ensures smooth lifting and lowering, and provides precise load positioning with zero drift. Built on a lightweight durable aluminum frame with powder coat paint finish, Lift'n Buddy can handle loads up to 350 lbs. and lift them a full 36". Heavy-duty 10" flat free polyurethane tires roll effortlessly over carpet, uneven floors, pavement, dirt and thresholds. Lift'n Buddy is powered by a maintenance free 12V rechargeable battery that provides ample power for even the most demanding applications.

1. Base platen allows unit to be freestanding even when raised and under load.
2. Generously sized 20" x 16" platform with load backrest has 10 slots for securing loads with bungee cords or straps.
3. Rear housing protects linear actuator, 12V maintenance-free battery and built-in charger.
4. Tethered push-button control allows users to adjust height from any side of the Lift'n Buddy .

Think Where You Could Use a Lift'n Buddy

Use Lift'n Buddy to transfer loads to shelves, workbenches, conveyors, processing equipment, delivery trucks, customer vehicles and more.

Manufacturing/Warehousing

Shipping & Receiving

Home Centers / Box Stores

Paint Supply Outlets

Bars & Restaurants

Contractor Supply Houses

Equipment Repair / Installation

Offices & Medical Facilities

Landscape Supply & Nurseries

Commercial Bakeries

Small Appliance Delivery

Route Delivery Trucks

Lifting and Transporting Heavy Loads...No Brainer

The need for a Lift'n Buddy for heavy loads is obvious...nobody should ever be required to lift and carry heavy, awkward loads. But, in addition to reducing physical strain Lift'n Buddy can also improve productivity. In fact, many jobs that require two people to lift and move items can be done in less time by just one worker and a Lift'n Buddy.

Lighter Loads Need a Lift'n Buddy too...Think About It

The benefits of a Lift'n Buddy for lighter loads may be less obvious, but they are equally significant. Repetitive bending, and lifting, even when the load is light, can really take a toll on workers.

Lifting a 20 lb. box may not seem like a big deal, but do it 100 times and you've lifted a ton! Over days, weeks and years, the weight really adds up. By reducing the amount of effort exerted by a worker, even one handling lighter loads, a Lift'n Buddy can dramatically improve productivity while reducing the risk of injury, repetitive stress disorders and costly workers compensation claims.

You don't need to replace all of your hand trucks,
but every worker should have access to a Lift'n Buddy

Specifications

MODEL	LNB-350
Capacity	350 lbs.
Vertical Travel	36"
Platform Dimensions	20" x 16"
Load Center	10"
Backrest Dimensions	20" x 13.5"
Flat Free Tires	10" flat free polyurethane (non-marking)
Controls	2 button up/down tethered
Overall Dimensions	20" x 52" x 30"
Overall Raised Height	85"
Maintenance Free Battery	12V 10 Amp lead acid
Charger	110V on-board

Options and Accessories
