

FLEXSHIELDS, LOCK-OUTS & KEY PULLING TOOLS

Defend against spills & dirt with a FlexShield™ Keyboard protector.

Defend Against Spills & Dirt

with a FlexShield™ Keyboard Protector. Protect your keyboard from cigarette ashes, coffee, soft drinks, paper clips, greasy fingers, food, glue, and more! Our high-quality urethane FlexShield can repel hazards while still allowing full use of the keyboard. When mishaps occur, just wipe the mess away and wash it with soapy water. There are 1,000's of different FlexShield designs to choose from, fitting most makes and models. With our highly flexible material base, you'll find that every key is just as easy to use as ever, without any restriction or interference from the membrane on the neighboring keys. Regardless of which keyboard, cash register, phone, or any other electronically keyed device you have, we've got you covered. **Call our sales department today with the make, model, & FCC I.D.# for your custom flexshield and give your keyboard some protection!**

FLEXSHIELD™ KEYBOARD PROTECTOR \$12.95 (Call for part #)

Now there's a new line of "made-to-last" universal dust covers, offering the best protection you can get from dust, spills, etc. for your equipment. Call a sales representative for information.

Keyboard Maintenance and Key Replacement.

To exchange keys, first you have to remove them. If you don't already have one, you'll need a key puller to remove keys and key caps. The Hooleon Universal Key Puller uses a specially designed flexible metal wire to lift any size or style key from most make/model keyboards. The Ring Type Key Pullers are plastic versions of our Universal Key Puller and work well on most makes and models.

Ring type key puller.

Universal key puller.

KEY PULLERS: For easy key removal.

IBM KEY PULLER (not shown)	#281-312-0002	\$3.95
UNIVERSAL KEY PULLER	281-999-0039	6.95
RING KEY PULLER	281-312-0049	2.49

KeyStopper™ Key Lock-Outs

Prevent costly data loss caused by accidental keystrokes by locking out critical keys during keyboard operation or programming. To completely disable a key, use a "Hard" KeyStopper (solid ring). To partially immobilize a key, use the "Soft" KeyStopper.
