APPROACH
to DRY SKIN

Gender, lifestyle
and everyday
causes of dry skin

Women's skin tends to dry-out more quickly than men's.

Hot baths and showers accompanied by the use of strong cleansers strip away protective lipids.

Sun exposure degrades the skin's natural moisture barrier, resulting in dry skin.

Lifestyle, climate, gender, and even age can affect the protective lipids within your skin, causing moisture loss and dryness.

To combat these every-day causes and symptoms of dry skin, we need to restore essential lipids and rebuild the protective barrier that maintains the skin's vital water/lipid balance.

While you may already be familiar with how your lifestyle, age, and gender may contribute to dry skin conditions, you may not have found a solution for alleviating and preventing its symptoms on your face and body.

Introducing

The TriLipid Research Institute, LLC

Jackson Hole, Wyoming

In 2010, after 35 years of developing skincare solutions, acclaimed scientist Alan Wohlman, Ph.D. and founder Frank Fanning chose the pristine setting of Jackson Hole, Wyoming to be the home of their innovative company.

Jackson's extreme temperatures and dry mountain climate make it the ideal proving ground for TRI's pioneering skincare products and the perfect setting in which to bring the collective knowledge, products, and expertise of its founders to life. While many skincare companies purchase pre-formulated crèmes from private-label manufacturers, TRI researches rare ingredients and their properties to develop its own unique, ground-breaking formulas. The result is trilipiderm™ – the harmony of science and nature that helps alleviate, heal, and prevent dry skin for women and men everywhere.

trilipiderm™ - a harmony of science and nature formulated to prevent dry skin

PURE SCIENCE
PURE INGREDIENTS
PURE SYNERGY

But it takes sophisticated science and decades of research to realize the full potential of these natural ingredients. The kind of expertise and experience TriLipid Research Institute brings to trilipiderm™ cr me. trilipiderm™ is a breakthrough formulation of ingredients which are actually enhanced by their synergistic interaction. It's the best of science and nature working in harmony.

Nature has given those of us with dry skin a gift – a gift of various plants, each of which can help alleviate or prevent an aspect of dry skin.

No other cream or lotion available today works in the way trilipiderm™ does. Because no other lotion or cream is based on the sophisticated science brought to trilipiderm™. Extensive research has proven that the active ingredients in trilipiderm™ moisturize the skin to prevent and cure dryness, relieve irritation, improve the tone, texture, elasticity and appearance of the skin, help remove wrinkles and help provide anti-oxidant protection for the skin. trilipiderm™ penetrates almost instantly to accelerate healing, and doesn't leave the skin feeling greasy. Use trilipiderm™ on your entire body, including your face. trilipiderm™ is non-comedogenic, contains no petrolatum, and is not tested on animals.

Meadowfoam

Limnanthes alba

Meadowfoam Estolides form a natural barrier to seal in moisture and prevent trans-epidermal water loss (TEWL). Meadowfoam Lactones significantly improve tone, texture and overall appearance of the skin.

Chamomile & Calendula

Matricaria recutita, Calendula officinalis

Facilitates the healing of skin inflammations and ulcerations.

Beta Sitosterol

A phytosterol derived from plants. Clinically proven to aid in the repair of damaged skin, and encourage the production of new collagen to reverse some of the effects of aging.

Olive

Olea Europaea

Replenishes the skin's layer of protective lipids. Olive Squalene provides a natural youthful luster to the skin.

Jojoba

Simmondsia chinensis

Replenishes the skin's natural sebum to help waterproof the tissue, keeping it moist and healthy.

Abyssinian

Crambe abyssinica

Smooths the skin, and eliminates a rough and flaky surface. Source of Omega-3 and Omega-6 Essential Fatty Acids.

PURE SATISFACTION

"I recently got a sample of trilipiderm™. I tried it, now I love it! I am in my 50s and have been looking for this type of product. It is great on my dry skin and lasts pretty much all day. Especially in this arid desert state, that's a miracle!"

-Louise U.
Scottsdale, AZ

"Thank you so much for introducing me to this fabulous product, trilipiderm™! The first time I used it, my skin felt nourished and younger. The non-greasy formula is very important to me, and the fragrance is quite pleasant. I like your product so much I would be willing to be a spokesperson! Thank you."

-Sharon S.
Bondurant, WY

"Your samples arrived in just the nick of time. I received a bad sunburn on my face (even after putting on sunscreen). Well, I used your samples and my face didn't even peel. I couldn't believe it. This moisture crème is AWESOME. You will definitely be getting future orders from me."

-Betty P.
Lynchberg, VA

"I've always had to buy separate lotions for my body and face due to the sensitivity of my skin and the redness that most normal lotions cause to my face. However, I've found that trilipiderm™ does not irritate my face, therefore it's now my lotion of choice."

-Laura O.
Thayne, WY

"With these 100° temperatures coming up I need all the hydration trilipiderm™ provides. Dry skin is a thing of the past. Thank you so much!"

-Barbara C-P.
Scottsdale, AZ

"I am very happy with the way trilipiderm™ helps my skin retain moisture. Living in the desert, my skin gets VERY dry. This product has helped my skin tremendously. It does not leave my skin feeling greasy and I immediately feel the benefits of this product!"

-Karen J.
Scottsdale, AZ

trilipiderm™ is available in an 8oz. Pump for your spa or bath, or three 1oz. Tubes conveniently sized for travel.
