Six Drawer Shelf

Made in the USA

Sprout is designed & manufactured in the US. Our products are sourced from local materials.

Modular & Reconfigurable

Sprout Products are modular. Every piece you add increases the possibility of things you can make.

Instructions, Videos & More

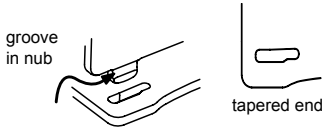

Scan the QR code or visit us online at www.sprout-kids.com for more ideas, videos, assembly, instructions, and to see what is new at Sprout

Tension Lock is a Patented Technology. It uses the natural properties of wood to create a simple, reusable, and sturdy joint without tools or hardware. How cool is that?

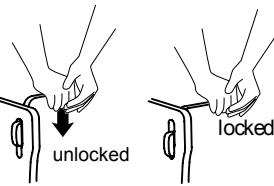

a

When assembling the parts line up the tapered end on the table with the groove in the nub.

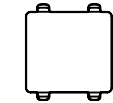

b

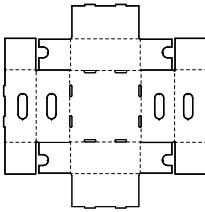

Press the joints to the locked position. This will require some force. For easiest assembly, position yourself above the joint and use your weight.

Instructions

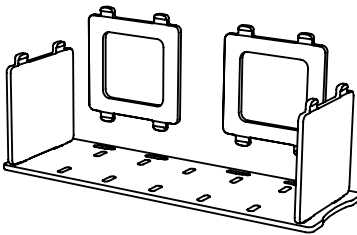

1

Slide the top and bottom pieces into place.

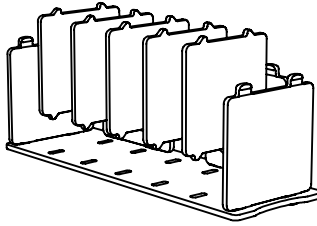

2

Insert back piece.

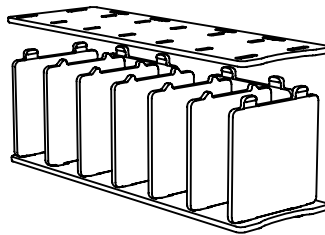

3

Insert square shelves.

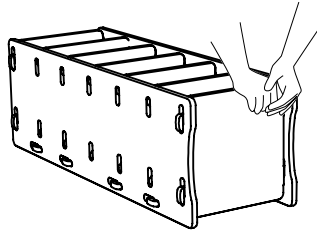

4

Press the other side piece into place with the bottoms aligned.

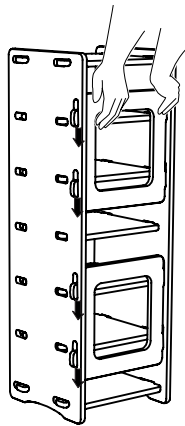

5

Lock pieces into place by pressing down on the top and bottom pieces.

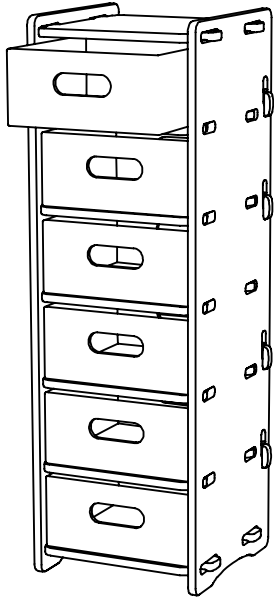

6

Stand cubby upright and press the back panels to lock them into place.

FINISHED

Now slide your bins into place and your six drawer organizer is ready to use!

X

To disassemble, flip the drawer organizer to its top and press down on the back pieces.

To release the top and bottom, roll it to its face and place a book underneath. Press down on the top or bottom of the respective corner to release the tension lock. Repeat the process with all other sides.
