**Guardian Power 3000**

**Phone Protector & 3000mAh Power Module**

Please read the manual in its entirety before using the device.

---

**WATER TEST - PERFORM FIRST**

Your case has been water tested. If you plan to expose your device to water, it is recommended that you perform a pre-installation water test. **Do not install device during test.**

1. Snap case front and back together.
2. Close charge port door and screw jack cover all the way in.
3. Submerge in water for 30 minutes.
4. Remove case. Dry the water off from the surface of the phone first, then inspect the inside for moisture.
5. Open charge port door and separate case.
6. If dry inside, perform the installation (on right). If wet inside, please contact tzumi.com/support.

---

**INSTALLATION INSTRUCTIONS**

Remove any screen protectors and clean device with cloth.

**STEP 1**

1. Place phone in case.
2. Place TPU cover in case.
3. Place TPU cover on.

**STEP 2**

1. Place TPU piece from case.
2. Place Lightning cable.

**STEP 3**

1. Turn phone on.
2. Charge phone.

---

**CHARGING YOUR POWER MODULE**

**NOTE:** Your Power Module comes pre-charged. Depending on a few factors, some of the battery might have discharged during transit.

- **Via AC Adapter/Wall Charger:** Using the provided Micro USB cable, connect your Power Module (Micro USB port) to the AC Adapter (USB port).
- **Via Computer:** Using the provided Micro USB cable, connect your Power Module (Micro USB port) to the computer/laptop (USB port).

It takes approximately 3-4 hours to fully charge your Power Module (from depleted unit). Once the charging is in progress, the LED indicator will light up red. When the charging is complete, the light will go off.

**NOTE:** Once fully charged, the Power Module is able to re-charge most smartphones 1-2 times depending on the battery capacity of the cell phone and the condition of the cell phone battery.

---

**PRODUCT SPECIFICATIONS**

- **Battery Capacity:** 3000 mAh
- **Type:** Lithium-ion
- **Input/Output:** 5 V/1A

**BATTERY DISPOSAL**

This product contains a Lithium-ion battery. Lithium-ion batteries are environmentally safe when fully discharged. Please refer to your local and state laws for battery disposal procedures.

---

**CHARGING YOUR SMARTPHONE**

**NOTE:** For best performance, make sure that the Power Module is fully charged. Refer to opposite page for charging instructions.

1. Place the Power Module over the back of the phone with Guardian installed. Insert one end of the Micro USB cable into the phone.
2. Insert the other end into the Power Module. The LED indicator will light up green and will remain green until you disconnect.
3. The charging process will start automatically. Charging time will depend on the type of device. Your device will display the charging progress.
4. When charging is complete, disconnect.

---

**IMPORTANT SAFEGUARDS**

- **Do not use this unit for anything other than its intended use.**
- **Keep the unit away from heat sources and direct sunlight.**
- **Do not expose the device to extremely high or low temperatures, as it may damage the battery.**
- **Do not use the unit if it enters the charging ports under the protective covers.**
- **The unit is not waterproof when its charging your phone as the charging ports will be exposed and not protected.**
- **Do not use the unit if it has been dropped or damaged in any way.**
