PAIRING TO BLUETOOTH DEVICE
Make sure the Bluetooth function is available on your electronic device. Specific pairing procedures may vary slightly depending on the device. For detailed information, please refer to your device’s User Guide.
1. After successful pairing, devices will remember each other. Therefore, no pairing will be needed next time.
2. Keep the distance between the device and the microphone within 3 feet (for pairing only).
3. Turn microphone on using power button.
4. Activate the Bluetooth function on your device to search for Bluetooth devices. Look for “Tzumi-PopSolo” in device list displayed and select.
5. Only for some electronic devices: Enter password, 0000.
6. Microphone is now ready for use.

BUILT-IN SMARTPHONE HOLDER
Built-in retractable phone holder is perfect for when you want to sing along while looking at the phone screen.

STEP 1: Access the phone holder by pulling it up.
STEP 2: Place the phone into the bracket. Fits smartphone up to 6 inches.
POPO SOLO CONTROLS
Turn ON/OFF: Press and hold.
Plause/Start: Quickly press.
Accompaniment ON/OFF: Quickly press.
Microphone: Quickly press.
Increase volume: Press and hold.
Decrease volume: Press and hold.
Adjust Echo factor: Quickly press.

RECORDING WITH MICROPHONE
*Note: Only records via audio cable. Bluetooth must be turned off.
1. Insert the audio cable to your phone, plug the microphone into the bottom of the microphone base.
2. Open your favorite karaoke app. Follow the instructions in the app and start recording.
3. When you are done recording, there are 2 ways to listen to your video.

LISTEN THROUGH THE MICROPHONE SPEAKERS:
Keep your phone unplugged into the microphone and replay your video.
LISTEN THROUGH YOUR PHONE:
Unplug your phone from the microphone, turn the microphone off and replay your video.

Please note - iPhone 7 & 7+ does not have a headphone jack. You will need an Apple supplied adapter to use this feature.

CHARGING THE MICROPHONE
1. When battery is low, the unit will automatically shut off.
2. Connect the Micro USB cable from the microphone to a power source. The Led Indicator will light red.
3. Charging will take about 2 hours.

FAQ / TROUBLESHOOTING
Q: Why is Bluetooth not pairing?
A: The distance between your phone and the device may be too far. Bring them closer together. OR the unit may already be paired with another device in range. Unpair the other device.

Q: Why does the microphone not turn on?
A: Make sure the unit is fully charged before use. The microphone will not turn on if battery level is very low. Blue light indicates a substantial charge.

Q: Why is there sound distortion or static when playing music?
A: Your phone signal may be weak, the volume may be too high or the battery power of the unit may be too low. Check the volume on the device and phone and make sure the microphone is fully charged.

Q: Why is there loud feedback when I start to record via microphone?
A: Some apps are incompatible with external audio input and operate best with headphones, thus making loud noise when recording via microphone. Try another app that is compatible with external audio input.

Q: Why won’t my recording play back through the device clearly while recording?
A: PopSolo is designed for use with karaoke apps that do not require headsets. PopSolo should be connected to your phone via 3.5 mm headphone jack to be recognized and work best. If your vocals are not recorded, the app must likely does not support the device. Try using a different app or device with a different operating system.
