

Sunny Isle Jamaican Black Castor Oil

Authentic Jamaican Black Castor Oil (JBCO) is made the traditional way by manually grinding the beans and extracting the oil and is generally the same across the board. Sunny Isle JBCO is 100% authentic and made in Jamaica.

The ash in JBCO is antiseptic, anti-inflammatory and antimicrobial and contains magnesium, manganese and silica derived from the roasting process. Generally across the board, all the brands will contain ash and if you have ever gotten to the bottom of a bottle of any of the brands the black stuff is evident. Sunny Isle claim to be the darkest JBCO on the market and contains the most ash but we have not any black stuff come out of the bottle so that is another plus.

Also the varieties of this Sunny Isle oil are numerous:

- ✓ Lavender Jamaican Black Castor Oil
- ✓ Ylang Ylang Jamaican Black Castor Oil
- ✓ Rosemary Jamaican Black Castor Oil
- ✓ Extra Dark Jamaican Black Castor Oil
- ✓ Lite Jamaican Black Castor Oil
- ✓ Regular Jamaican Black Castor Oil

Pomades and a shampoo and conditioner are also available. Whatever brand you buy make sure you use it correctly.

Varieties of Sunny Isle JBCO

With so many varieties of Sunny Isle Jamaican Black Castor Oil, quite a few people have asked which one they should purchase or which one is the best one.

The answer: they are all good and all contain 100% authentic Jamaican Black Castor Oil with no added salt. The variety you choose is really down to personal preference.

	<p>Lavender oil is the most known scent throughout the aromatic world, and regarded as the most versatile essence in aromatherapy. It has a sweet, balsamic, floral aroma which combines well with many oils including Jamaican Black Castor Oil. Lavender is a natural antibiotic, antiseptic, anti-depressant, sedative and detoxifier. It works well on dry or acne prone skin. People who have alopecia can also use lavender, to treat their hair loss. So, for those of you that have dry acne prone skin, Alopecia, and or want their hair to grow fast then the combination of pure Lavender Essential Oil and Jamaican Black Castor Oil will get the job done.</p>
	<p>In aromatherapy, Ylang Ylang evokes feelings of deep calm that melt away anxiety, tension and stress. It has a fabulous stimulating effect on the skin. Ylang Ylang oil helps to correct the production of sebum (Oil) in the body and is also of great value in hair care.</p>

	<p>Lite, Regular, Extra Dark</p> <p>These varieties only contain the JBCO but the ash content is varied. The JBCO contains components that form an antimicrobial layer combating hair loss caused by bacterial or fungal agents.</p>
	<p>Rosemary is a popular choice for massage, which can be attributed to its sweetness and freshness. Rosemary essential oil use has proved to be very effective in treating arthritis, gout, cramping of muscles, rheumatism and neuralgia etc. It is beneficial in relieving the tired muscles and also considered advantageous for improving the blood circulation. It plays a vital role in hair care. It protects the hair from the strong hold of dandruff. So for those of you who want a sweet, fresh scent on your skin and, or healthy hair, along with the effectiveness of Sunny Isle Jamaican Black Castor Oil, then this combination is just for you.</p>

If you are using JBCO for hair loss choosing a particular variety might depend on the reason for your hair loss. Handling your hair loss is really a matter of determining what caused the hair loss in the first place.
