

NEW FEATURE SPOTLIGHT

MAG DOCK

Available on all PRO products

The new MagDock feature truly sets the lilitab tablet kiosk system apart from all other tablet kiosks.

The patented MagDock feature is in the top of the pole where the lilitab head is mounted. With the turn of a key, the head unit easily **detaches** for **assisted selling**, **maintenance** or **access to the tablet**. Dock the head unit in portrait or landscape orientation and the pass-through power automatically begins to **charge the tablet**, no cables to connect!

In public environments, stuff happens. Who wants to call and wait for a technician when it does? If your tablet stops working, just turn the key to **swap in a new head unit**. Problem solved—no waiting, no technician necessary. And you can rest assured your tablet is safe. The **high quality lock** offers 100 different randomly assigned key codes, custom and large orders can be keyed alike on request.
