

Announcing lilitab Generation 2 Tablet Kiosks

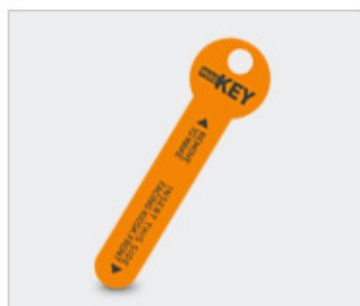

NEW FEATURE SPOTLIGHT

MAGKEYAVAILABLE ON
PRO + BASIC LINES

lilitab's exclusive MagKey securely sleeps your iPad when not in use—waking in the same state you left it in.

The patent-pending MagKey is included with both the **Pro and Basic lines**. It's simple to use—just insert the MagKey into the provided slot on the backside of the lilitab head unit. Once inserted, the iPad will sleep, **saving power**. While asleep, the iPad can still receive updates and perform background tasks. When you want to wake the iPad, simply remove the MagKey and voilá—**resumes functions immediately**.

The Magkey is ideal for **retail stores** that power down their fixtures at night. Staff can **securely sleep** the lilitab without accessing or removing the iPad. Directions for use are printed on the MagKey. It couldn't be more simple to use. Lose your MagKey? Not a problem. You can order **replacement keys** from our website for \$10.
