

NEW!! Alcolizer 5 Series

With support and input from a number of its local/international police and industry customers, Alcolizer developed the new Alcolizer 5 Series hand held breath testing device.

Following the global financial crisis, saving time and money has become critical to both government entities and industry alike. In a world first development (Patent Pending), the Alcolizer 5 Series introduces a system that enables recalibration and service to be completed on-site in around 60 seconds. Over the life of the instrument, this system delivers significant savings and efficiency for Police and industry customers alike.

Delivering outstanding display and response times together with new design features the new Alcolizer 5 Series continues the Alcolizer tradition of ground breaking technological development delivering solutions to its customers.

Features:

- Fast zero test response
- Colour graphics LCD display – daylight readable
- Highly responsive, mini electrochemical fuel cell
- Easy “mobile phone style” menu operation
- Multi-language capability (English, Chinese, Vietnamese, Spanish, Russian...) others possible
- Multi-function capability – Active and Passive Modes
- -5°C to +50°C temperature operating range
- Rechargeable Li-Ion battery system (1,000+ tests per full charge)
- 20,000 + data logging capability, USB download connection
- Proven accuracy within +/- 5% (AS Certified 3547 Type II)
- Security coded, programmable settings
- Programmable statistic gathering options
- Ergonomic design
- Protective silicone cover available in a variety of colours or custom order >

The Alcolizer 5 Series On-site Recalibration & Service System

The **Alcolizer 5 Series** has been designed to feature a world first replaceable pre-calibrated module system. On-site recalibration can now be done in around 1 minute, resulting in minimal operation disruption, saving the customer time and money. There is no need to return the complete model for servicing anymore:

Every 6 months, Alcolizer Technology will send to you your replacement pre-calibrated module. (The first module replacement is part of your original purchase).

Using a screwdriver, remove the screw at back of the 5 Series.

Slide the used module off the device.

Return your used module to Alcolizer via the supplied overnight shipping bag, where it will be recalibrated and held for you for the next service

Slide the new module in place, replace the screw, press ENTER and your new Alcolizer 5 Series is ready to use.

Additional Options:

- GPS
- Bluetooth Printer (cable-free)
- Hygienically packaged mouthpieces >
 - Standard with locator ring
 - ST/NRV – Spit-trap/Non-return Valve
- Customized software packages (menu and language options)
- Customized aluminum carry case or Police style shoulder bag for Alcolizer 5 Series, printer and accessories

Mouthpiece Options

Bluetooth Printer

Occupational Health and Safety Users Please Note:

Passive screening may be affected by environmental factors (ie: wind, fans, air-conditioners) and its reliant on the training and skill of the person administering the test. To obtain an accurate BAC (blood alcohol concentration) reading, a mouthpiece should be used on all breath test instruments regardless of brand or model.

To maintain "police standard" accuracy and Australian Standards Certification the 5 Series requires recalibration every 6 months and is fitted with an automatic shut down mechanism for added safety. The Alcolizer 5 Series comes with easy to replace, on-site recalibration modules for convenience.
