

“To put it simply, this thing works... Installation is easy...this is a great deal if you are cursed by low signal strength.”

-Tim Stevens, Engadget

“Bear Extender blasts out wireless signals with more than 20 times the raw power of the Wi-Fi radio Apple builds into its current devices.”

-Glenn Fleishman, Macworld

“The best recommendation I can give it is that, rather than send back the review unit, I bought it.”

-Dave Winograd, TUAW

Where to Buy

BearExtender products are available for purchase in the US at www.BearExtender.com

Long Range WiFi for Macs

BearExtender Mini is a long range wireless adapter designed for Apple computers.

Half the size of the original BearExtender, and now packed with 1000mW max RF output power, it picks up Wi-Fi signals from 2-4 times the distance of Apple Airport cards.

The Story

BearExtender was originally designed to help students at the University of California, Berkeley, connect to the campus wide network called "Airbears."

Reception on campus can be difficult due to limited access points and building materials.

BearExtender Mini was designed to be compatible with the latest 802.11n technology, without sacrificing reception to 802.11g access points which are common on college campuses.

The original BearExtender won rave reviews from Engadget, Macworld, TUAW, iCreate, and other publications.

Award Winning Range

Only
\$49.97

Full 1 Watt Power
Up to 4X Range!

What's New

Upgraded 1000 mW Maximum Output

An additional 300mW of power compared to the original BearExtender (700mW) helps cut through interference.

Half the Size

About the size of a household key. Yet packs the power of a full size BearExtender.

Smarter for the Environment

Integrated components and refined design allows for a smaller circuit board and less plastic. RoHS compliant.

Tech Specs

1000 mW Maximum Power Output
802.11n, 802.11g and 802.11b
150 Mbps maximum throughput

Compatibility

Mac OS X 10.8 Mountain Lion
Mac OS X 10.7 Lion
Mac OS X 10.6 Snow Leopard
Mac OS X 10.5 Leopard
Mac OS X 10.4 Tiger
Mac OS X 10.3 Panther

Extend your Wi-Fi Range with BearExtender Mini
