

Dear Elf Host Family,

It has been brought to our attention that your Elf has lost its magical flying powers. This usually happens for a few reasons, but the two most common are:

- #1 - a family member accidentally touches your Elf.
- #2 - your Elf lost its balance and fell from its lookout.

To restore your Elfs flying powers follow these directions:  
Have a grown up carefully pick up your Elf and place it in a bowl.  
Look in your kitchen for sugar. Get a spoon and sprinkle 1 spoonful of sugar over your Elf. Leave the bowl in a safe place.  
When the stars come out late at night, they will activate the sugar and your Elf will regain his flying powers.

Yours Truly,

Bernard - Head Elf Travel Coordinator  
North Pole Elf Aviation Center (NPEAC)
