

GLASS BREWER

Perfect for steeping any tea type

HOT BREW:

1 Add the specified amount of tea directly into the brewer.

2 Heat water to the specified temperature in a separate pot or kettle.

3 Pour water down the side of the brewer to avoid scorching the tea leaves.

4 Cover the brewer with the lid/strainer and steep for the specified amount of time.

5 When ready, pour the tea directly into your drinking vessel of choice.

COLD BREW:

1 Add twice the specified amount of tea directly into the brewer.

2 Fill the brewer with cold water.

3 Place the brewer into the refrigerator and let the tea leaves steep for 24 hours.

4 Cold brew tea can keep for up to 7 days when refrigerated. If desired, tea leaves can be resteepped up to 3 times.

ENJOY!
