

CAST IRON TEAPOT

Perfect for steeping black and dark oolong teas

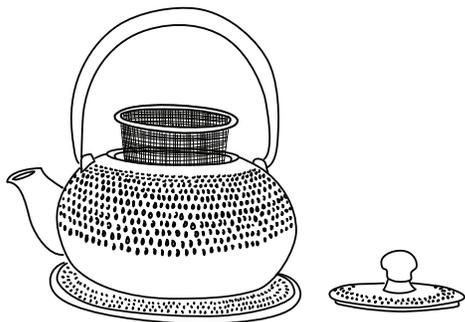

1 Add the specified amount of tea into the basket inside the cast iron teapot.

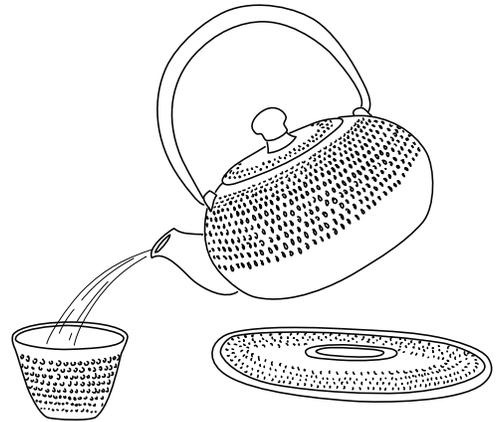

2 Heat water to the specified temperature in a separate pot or kettle.

3 Pour the hot water over the top of the tea leaves until the teapot is completely filled.

4 Steep the tea leaves for the specified amount of time, then remove the infuser basket.

5 When ready, pour the tea into the cast iron cups.

6 If desired, place the cast iron teapot over a low flame on the stovetop to keep the tea warm. Do not boil water using the teapot.

ENJOY!
