Thank you for taking a moment to check out the ThermoVape Family of Vaporizers.

Thermo-Essence Technologies is a small American Manufacturing Company committed to building the world's finest portable vaporizers.

All of our products begin with the highest quality American Sourced Medical Device Grade raw materials. Our revolutionary design and technology is brought to life with precision machining and our hand finishing, testing and final assembly.

We build all of our Portable Loose Leaf, Essential Oil, and E-Cig vaporizers at our facility in the heart of the Silicon Valley. Please enjoy our Summer 2012 Catalog featuring our newest and best selling products.

We are sure you will see that American innovation and an Uncompromising commitment to quality result in truly exceptional vaporizers.

AMERICAN MANUFACTURING

Thermo-Essence Technologies truly believe that vaporizers are revolutionary products. We found that we loved the quality of expensive plug in vaporizers but wanted something portable. The result of that desire are the world's first portable convection vaporizers. We have also built the Revolution, a purpose driven device for the new and growing essential oil market. We hope you enjoy our catalog. We build the vaporizers that we use everyday and give to our family and friends. Vaporizers for those that refuse to compromise on quality and performance.

Travel.

* Excluding Batteries & Switch Spring

AMERICAN MANUFACTURING

We precision machine each ThermoVape from American sourced Aerospace Grade T6 6061 Aluminium. We then electroless nickel plate the aluminum parts prior to hand assembly for increased corrosion resistance. The T1 is insulated with FDA Approved Delrin, an extremely high quality and durable polymer. The result is the lightest, strongest, and most elegant vaporizer available.
