

EPIFANES NONSKID DECKCOATING

Superior hardness, and ease of application!

Type	One-component semi-gloss urethane-alkyd resin based deckpaint containing polypropylene beads as a nonkid agent.
Color	White, Cream #1, Gray # 212 (see color chart).
Gloss	Eggshell
Recommended use	Nonskid finishing coat for wood, steel, aluminum and fiberglass in conjunction with the appropriate primers. For exterior and interior use above the waterline.
Properties	Excellent color retention, cleans easily and stands up to rough wear. Polypropylene beads are considered superior as a non-skid agent because the beads absorb a portion of the finish maintaining color retention and structural integrity. Provides even coverage when rolled.
Container Size	750 ml.
Density	1.10 - 1.30 kg./liter
Solids Content	60 +/- 2 vol. %
Recommended film thickness	Per coat wet 100 micron Per coat dry 60 micron
Application	Best by roller, or brush.
Thinner	Epifanes Brushthinner for Paint and Varnish
Drying times at 65F / 65% RH	Tack free - 1 hour Hard dry - 24 hours Tape free - 24 hours Recoatable - 24 hours Note: Allow 72 hours before walking on last coat.
Application Notes	See instructions "Finishing Yacht Enamel". Replace topcoats with Nonskid. Coverage approx. 80 sq. ft. per liter.
Application conditions	Temperature should be between 50F. and 85F. during application. Air humidity below 85%. Avoid painting in too much wind or sun. A rapid loss of solvents will occur under these conditions and will decrease the flowing ability. Add thinner up to the specified percentage to compensate for the faster release of solvents. Epifanes Nonskid Deckcoating can be used over most types of one-component alkyd or urethane-based paint systems and over properly sanded two-component paint systems.
