

Polarstar

Film-backed abrasives

Polarstar – for tackling the latest o

MIRKA POLARSTAR. As you'd expect from a world leader in abrasives technology, Polarstar is not your average sanding disc. It has been specifically developed to efficiently tackle the latest surface prep and repair applications. Polarstar uses a polyester film backing material (in contrast to paper) to create a more flexible and much smoother abrasive surface. As a result, Polarstar produces a finer, more consistent surface finish more quickly and, because it also has excellent resistance to clogging, it lasts longer, too.

Add up the features and see how Polarstar can provide a more effective solution to your sanding needs:

- Outstanding performance on demanding applications such as hard tooling gelcoats and the latest scratch resistant automotive clearcoats.
- Manufactured using Mirka's unique, environmentally friendly solvent-free coating system.
- Unique abrasive material resists clogging and delivers long lasting performance.
- Designed for optimum performance on both wet and dry sanding.
- Excellent durability – retains its high performance sanding properties for far longer, especially on harder applications.

demanding coating applications

Optimum performance on both wet and dry sanding.

Retains its high performance sanding properties for far longer.

Resists clogging and delivers long lasting performance.

Polarstar • Technical specifications	
Grain	Silicon carbide
Bonding	Resin over resin
Backing	Polyester Film
Coating	Semi-open
Color	Green / white
Grit range	P 800, P 1000, P 1200, P 1500

POLARSTAR RANGE. Another major advantage is the versatility of the range. With grades covering P 800, P 1000, P 1200 and P 1500, Polarstar is the ideal solution for a wide variety of tasks from paint rectification (P 1200 and P 1500) through to the surface conditioning of primer fillers and the repair of tooling gelcoats (P 800) in the marine and automotive sectors.

Optional tailor-made backing pad and interface pad can be used to achieve an even finer finish.

Finer abrasive grades provide an ideal pre-polish for Mirka's Polarshine polishing system.
