### Collar Sizing Instructions

Collar size is determined by measuring the circumference of your dogs neck at its widest point. Our breed list is a starting point but the only way to ensure you have the correct collar size is to measure the your dog's neck. Feel free to contact us if you have any questions.

### Harness Sizing Instructions

Our harnesses are designed based on the circumference of your dog's chest barrel. This is the widest point between the front and rear legs. It is best to use a cloth measuring tape but if you do not have access to a cloth measuring tape you can simply use a piece of string and mark the starting and ending points and measure the length using a ruler or tape measure
