Home I Hardware Centers

Prevent moisture damage of property, tools and equipment in the Garage, Attic, Basement, Bathroom, Kitchen, Fridges, Freezers and Safes. Protect closets and storage spaces.

How To Use H2Out® SPACE

DRYERS

Place the H2Out® SO (Space Dryer) in tile area to dry. Capture water vapor before it damages property.

The drying process is gradual and over a period of a few weeks pulls the excess moisture out of the air. The Inside media turns from blue to pale pink showing the unit is working and after several weeks tile unit is ready to reactivate.

Infinitely Renewable

Simply place the H2Out® SO element in an oven for one -two hours at 325° F (160°C). The pink disappears and turns blue again. The unit is now ready for re-use.

"Electric and Convection ovens.

"Does not reactivate in Gas ovens.

*Do not microwave.

H2Out® Space Dryers use the same technology used by NASA to keep the Apollo interior dry. They remove moisture, eliminating rust, corrosion, oxidation and tarnish on electronics, tools, guns, equipment and protects from mildew, mold and odors. H2Out Space Dryers are Nontoxic and Renewable. Mold can grow on almost any surface when there is moisture and high humidity. You can control mold growth by keeping your Interiors dry with H2Out Space Dryers.
