

Go Go Go!

GB Toys' (Golden Bear) new collection, Go MINI, will bring fast action stunts and ultimate style to any Christmas wish list this year!

Go MINI Crew-zers are the perfect stocking filler gift to start a collection. There are five super cool styles each with its own character name, such as Chilli the red hot Crew-zer and Jaxx the patriotic royal blue dude emblazoned with a Union Jack.

The show offs of the forecourt, however, are the Go MINI Stunt Racers. There are six to collect* and each comes with two modes – race and stunt, with every car having a different unique stunt. The Stunt Launcher is a must have accessory and will auto charge any of the six Stunt Racer cars. Just position it on the launcher, pump up the power to see the rev counter climb and hear the engines roar. Once charged it's ready to launch so press the start button and watch as the car speeds ahead or performs a stunt!

Alternatively, the Go MINI Freestylers have their own unique and quirky features that make them a truly customised crew! Beats comes with a supped up sound box in his boot whilst Bulldog is a true Brit, complete with Union Jack decoration and a Bulldog which pops up from the roof with the press of a button.

For a top of the range Go MINI then the RC Wolf Rally Car is the highlight of the show room. This remote control speed machine has lights and sounds that are activated by the steering wheel remote handset. Wolf likes to race and like any true rally car knows when to throw a skid or two - or to manoeuvre himself out of tight spots he can reverse into a quick spin.

GB Toys' Go MINI collection represents one of the finest and most exciting launches for the younger boys this Christmas. With four ranges and 17 cars to collect, each with its own name, fun features, and unique decoration there's a Go MINI for everybody.

*

There are 5 Stunt Racers in the normal range and one exclusive Stunt Racer that is only available with the Stunt Launcher.
