1. Post with Post Caps attached (4)
2. Side Panels (8)
3. 3.5" Stainless Steel Screws (16)

3

*Not to Scale*

### General Information

- **Read Instructions through carefully before beginning assembly.**
- When assembling components, place on a non-abrasive surface (i.e. shipping box) to avoid scratching.
- We recommend an area approx 4'x 8' for unobstructed assembling.
- You should not need to use excessive force when assembling components.

# STEP ONE

## Raise Bed Installation

**1**

Excavate four, 8-inch holes in a square pattern (60½" x 60½") as shown aside. Holes are to be 12 inches deep.

**2**

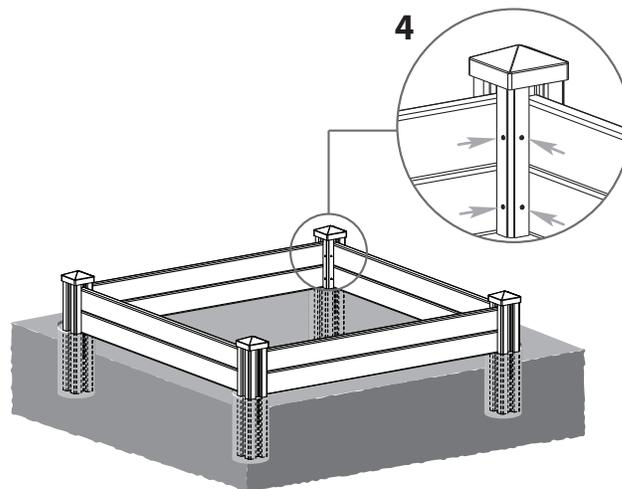

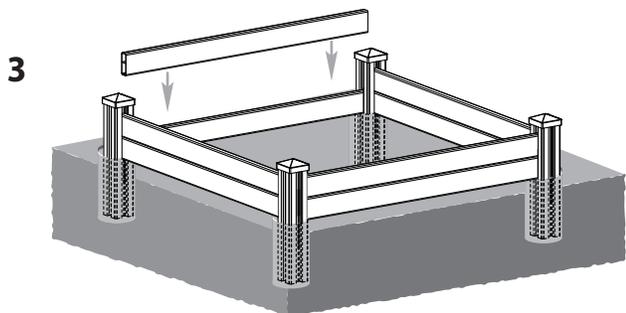

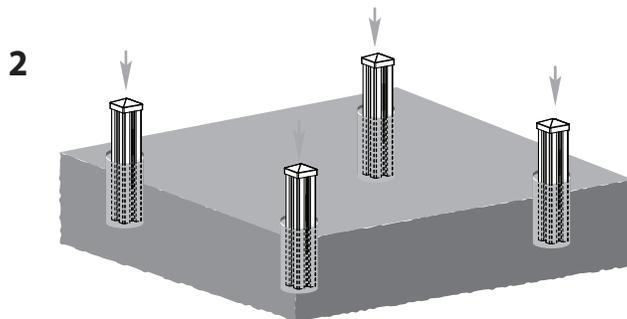

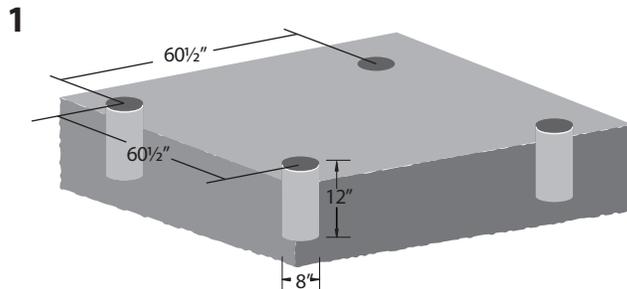

Place a post into each of the four holes. The posts will be buried 12 Inches into the ground.

**3**

Stack the side panels two high between the posts. You will have to maneuver the posts to allow room for the side panels to slide in between. While ensuring the posts and side panels are level, replace the excavated dirt back and around the holes.

**4**

Using the screws provided, fasten the side panels to the posts. (One screw for each intersection of side panel and post).

# STEP TWO

## Extension Installation

**6**

If you've purchased the Extension Kit (sold separately), Repeat the steps above. The distance between the posts should be 56 inches apart.
