

nanoSMOOTHING™ SYSTEM

[for stronger, healthier, beautiful, manageable hair]

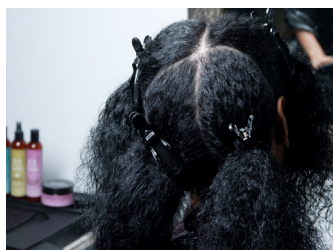

INSTRUCTION MANUAL

PART I Hair Preparation

Remove all build up from the hair cuticle and prepare the cuticle to receive the Smoothing System

- 1) Shampoo the hair twice with the Huetiful™ Clarifying Shampoo. Repeat, if the hair still has product build-up after the second shampoo.
- 2) Towel blot hair and detangle with a wide-tooth comb.

PART II Huetiful nanoSMOOTHING™ System Application

- 1) Divide the hair into 4 sections keeping in mind that you will start the application from the nape of the neck (base of the head).
- 2) Take 1/2 inch partings and apply 2-3 pumps of the Huetiful nanoSMOOTHING™ Treatment at the root of each 1/2 inch section and comb through to the ends. You should use a total of about 2oz of mousse for hair that is just below the shoulders.
- 3) Comb through the hair thoroughly to ensure that all hair has been completely saturated.
- 4) Allow the nanoSMOOTHING™ treatment to process for 20 minutes under a plastic cap.
- 5) Once the treatment has set for 20 minutes, the process is complete DO NOT RINSE.

Product Amount Recommendations:

Use approximately 2 ounces. Extra curly/kinky, resistant, and long hair may require up to 6 ounces of the treatment.

PART III Infusing the HSS with Heat

Application of the Leave-In Protectant can be sprayed on the hair at this point, however, depending on the hair texture the leave-in may weigh the hair down. Taking medium subsections, starting at the back, blow dry hair from root to ends until completely dry.

Section hair 1/8-inch partings, flat iron hair at 380°-400°, doing 1-2 passes from root to ends. You do not need high heat once the treatment has been blow dried. The system is designed to restructure the bonds within the hair shaft; allowing for lower heat to sufficiently straighten the hair.

Style as desired.

TIP: To eliminate steam or smoke do not apply more than 3 pumps of the mousse to each 1/2-inch partings. Any steam or smoke that may occur while blow-drying, is NORMAL. Any odor during this procedure is the product being dispersed into the air and is HARMLESS to your health.

MAINTENANCE:

For optimal results it is recommended to shampoo hair 2-7 days after application of Huetiful Smoothing treatment. Exclusively use the Huetiful after-care Shampoo and Conditioner that has been specifically designed to maintain the longevity of the treatment.

- 1) Shampoo the client's hair with Huetiful nanoSMOOTHING™ Treatment Maintenance Shampoo to remove any residue.
- 2) Towel blot and apply Huetiful nanoSmoothing™ Maintenance Conditioner to hair for hydration and lightweight moisture.
- 3) Rinse thoroughly after 2-3 minutes.

4) Lightly spritz entire hair with the Huetiful Leave-In Protectant on towel-dried hair for protection and smoothness when drying.

5) Proceed to blow dry, and style as desired.

RESULTS:

Huetiful nanoSMOOTHING™ System offers many results that can be achieved depending on the method chosen from de-frizzing to extreme curl reduction. The HSS leaves all hair types amazingly healthy, manageable, and smooth! HSS helps to strengthen and repair all hair types, leaving the hair in better condition.

Results will vary depending on hair type, home maintenance routine, and exposure to the elements.

FREQUENTLY ASKED QUESTIONS

What is the Huetiful nanoSMOOTHING™ System?

The Huetiful nanoSMOOTHING™ System is one of the most advanced and safest low pH mechanisms that is designed to silken, stretch and smooth wavy or curly, frizzy or processed hair. The result is stronger, healthier, beautifully manageable hair that can be worn straight or in its natural wavy or curly state.

The Huetiful nanoSMOOTHING™ System transforms the hair without the use of harsh, permanent chemicals and without permanent alteration to the hair's bond structure; so hair is silky smooth, perfectly curled and unimaginably frizz free. You get the flexibility of natural hair to be worn straight with resistance to swelling from humidity or worn naturally curly with maximum curl definition and length.

Is the Huetiful Smoothing System a chemical?

No, the Huetiful nanoSMOOTHING™ System is not a chemical. It is neither a relaxer nor keratin system. The Smoothing System does not use any harsh or permanent chemicals and does not break the disulfide bonds like a relaxer. Unlike many keratin systems, the Huetiful nanoSMOOTHING™ System is certified Formaldehyde Free. Because the molecules are smaller than a keratin molecule, the Huetiful nanoSMOOTHING™ System does not rely on harsh chemicals to facilitate the penetration of the smoothing treatment.

How does the Huetiful nanoSMOOTHING™ System work?

The Huetiful nanoSMOOTHING™ System's amino acid based formula temporarily elongates the bonds of the hair. When proper heat is applied it creates a reaction that infuses essential hair proteins inside the hair and rebuilds the hair from the inside out.

Can I use Huetiful Smoothing System on relaxed or chemically straightened hair?

The Huetiful nanoSMOOTHING™ System is perfectly suited to be used on previously relaxed hair that is transitioning to natural. It will eliminate frizz while restoring hair strength; making it silky and smooth. ►

FREQUENTLY ASKED QUESTIONS, CONTINUED

Can I color my hair before or after using the Huetiful Smoothing System?

Semi, Demi or Permanent Color can be used before or after the use of the Huetiful nanoSMOOTHING™ System. You should apply color at least one week prior to receiving the Huetiful nanoSMOOTHING™ System or at least two weeks after receiving the treatment. It may be necessary to formulate one to two shades darker when coloring before the use of the Huetiful nanoSMOOTHING™ System, as the system may lift/lighten the color by one to two shades.

Does the Huetiful Smoothing System contain Formaldehyde?

No, the Huetiful nanoSMOOTHING™ System does not contain Formaldehyde or any derivatives of Formaldehyde.

How long does it last?

The Huetiful nanoSMOOTHING™ System can last up to 12 week, depending on hair type, texture and process of application.

After long term use is there a permanent effect?

There is no long-term effect because the Huetiful nanoSMOOTHING™ System does not break the hair bonds.

How long does it take to perform the Huetiful nanoSMOOTHING™ System?

An average of 60-120 minutes depending on the hair type, length, thickness and experience of the person applying the system.

How much of the Huetiful nanoSMOOTHING™ System is used per treatment?

At least 2 ounce of HSS for an average hair length of 10-15 inches. Amounts will vary depending on hair length and hair type. Long and tightly coiled hair can require 4 ounces or more.

How many applications will one (8 oz.) bottle yield?

An average of 4-6 applications per bottle. A regular application is considered to be about 10 inches of curly hair. Very curly, long, and resistant hair may require more.

How often can the client have the application done?

The Huetiful nanoSMOOTHING™ System is designed to last up to 12 weeks depending on hair texture and the number of shampoos. The entire head must be processed each time for maximum results.

What is the shelf life of the product?

The product's shelf life is 1 year. Be sure to store at room temperature to decrease ingredient separation.

Is the Huetiful nanoSMOOTHING™ System safe to use on a child's hair?

Yes, the Huetiful nanoSMOOTHING™ System is gentle enough to be used on a child without causing damage to the child's hair.
