FAQs

How does the Huetiful nanoSMOOTHING™ System work?

The Huetiful nanoSMOOTHING™ System's amino acid based formula temporarily elongates the bonds of the hair. When proper heat is applied it creates a reaction that infuses essential hair proteins inside the hair and rebuilds the hair from the inside out.

Is the Huetiful Smoothing System a chemical?

No, the Huetiful nanoSMOOTHING™ System is not a chemical. It is neither a relaxer nor keratin system. The Smoothing System does not use any harsh or permanent chemicals and does not break the disulfide bonds like a relaxer. Unlike many keratin systems, the Huetiful nanoSMOOTHING™ System is certified Formaldehyde Free. Because the molecules are smaller than a keratin molecule, the Huetiful nanoSMOOTHING™ System does not rely on harsh chemicals to facilitate the penetration of the smoothing treatment.

Does the Huetiful Smoothing System contain Formaldehyde?

No, the Huetiful nanoSMOOTHING™ System does not contain Formaldehyde or any derivatives of Formaldehyde.

Is the Huetiful Smoothing System for relaxed or chemically straightened hair?

The Huetiful nanoSMOOTHING™ System is perfectly suited to be used on previously relaxed hair that is transitioning to natural. It will eliminate frizz while restoring hair strength; making it silky and smooth.

Can I color my hair before or after using the Huetiful Smoothing System?

Semi, Demi or Permanent Color can be used before or after the use of the Huetiful nanoSMOOTHING™ System. You should apply color at least one week prior to receiving the Huetiful nanoSMOOTHING™ System or at least two weeks after receiving the treatment. It may be necessary to formulate one to two shades darker when coloring before the use of the Huetiful nanoSMOOTHING™ System, as the system may lift/lighten the color by one to two shades.

How long does it last?

The Huetiful nanoSMOOTHING™ System can last up to 12 week, depending on hair type, texture and process of application.

After long term use is there a permanent effect?

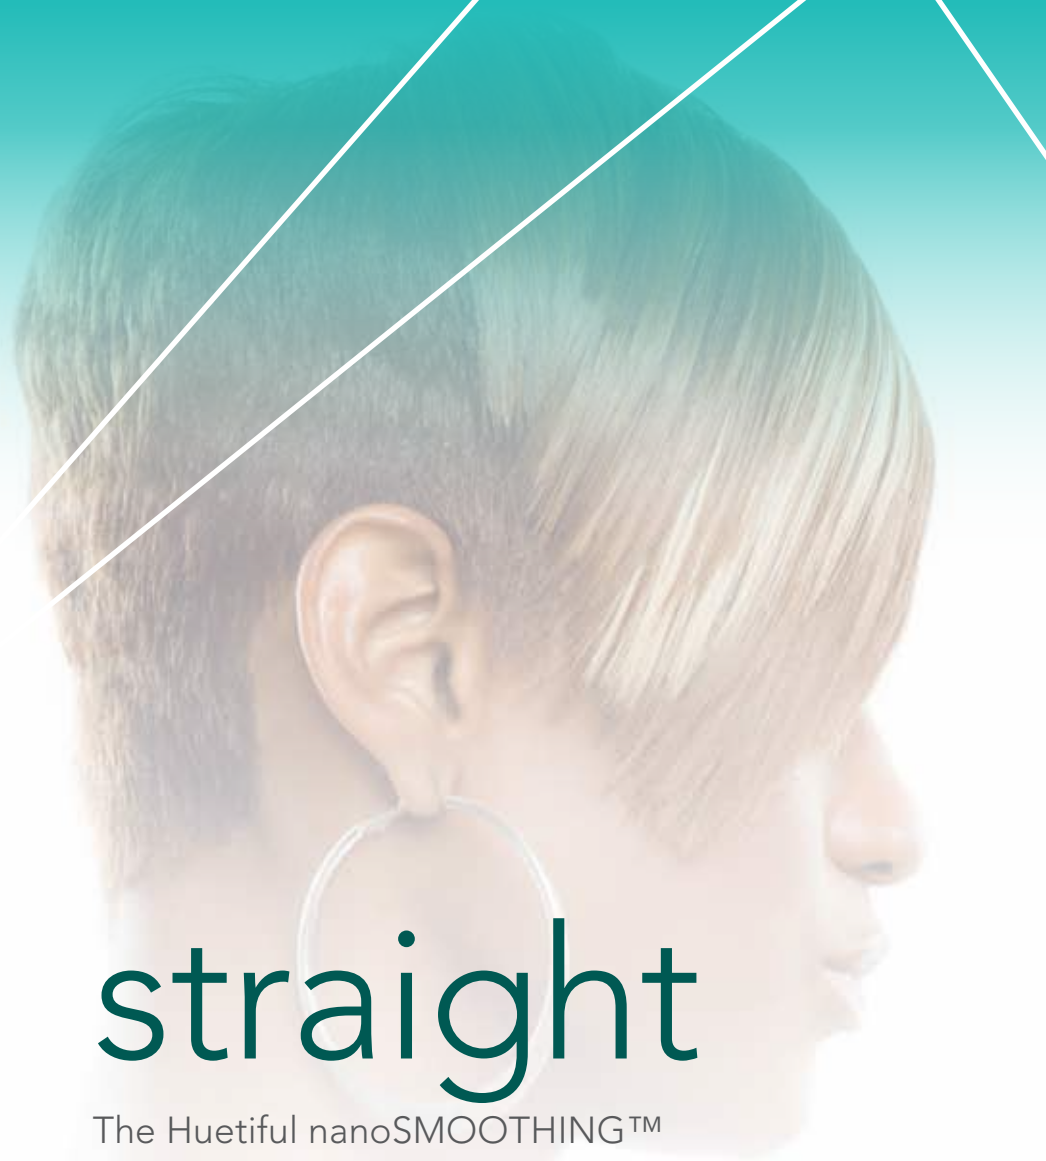

There is no long-term effect because the Huetiful nanoSMOOTHING™ System does not break the hair bonds.

nanoSMOOTHING™ SYSTEM

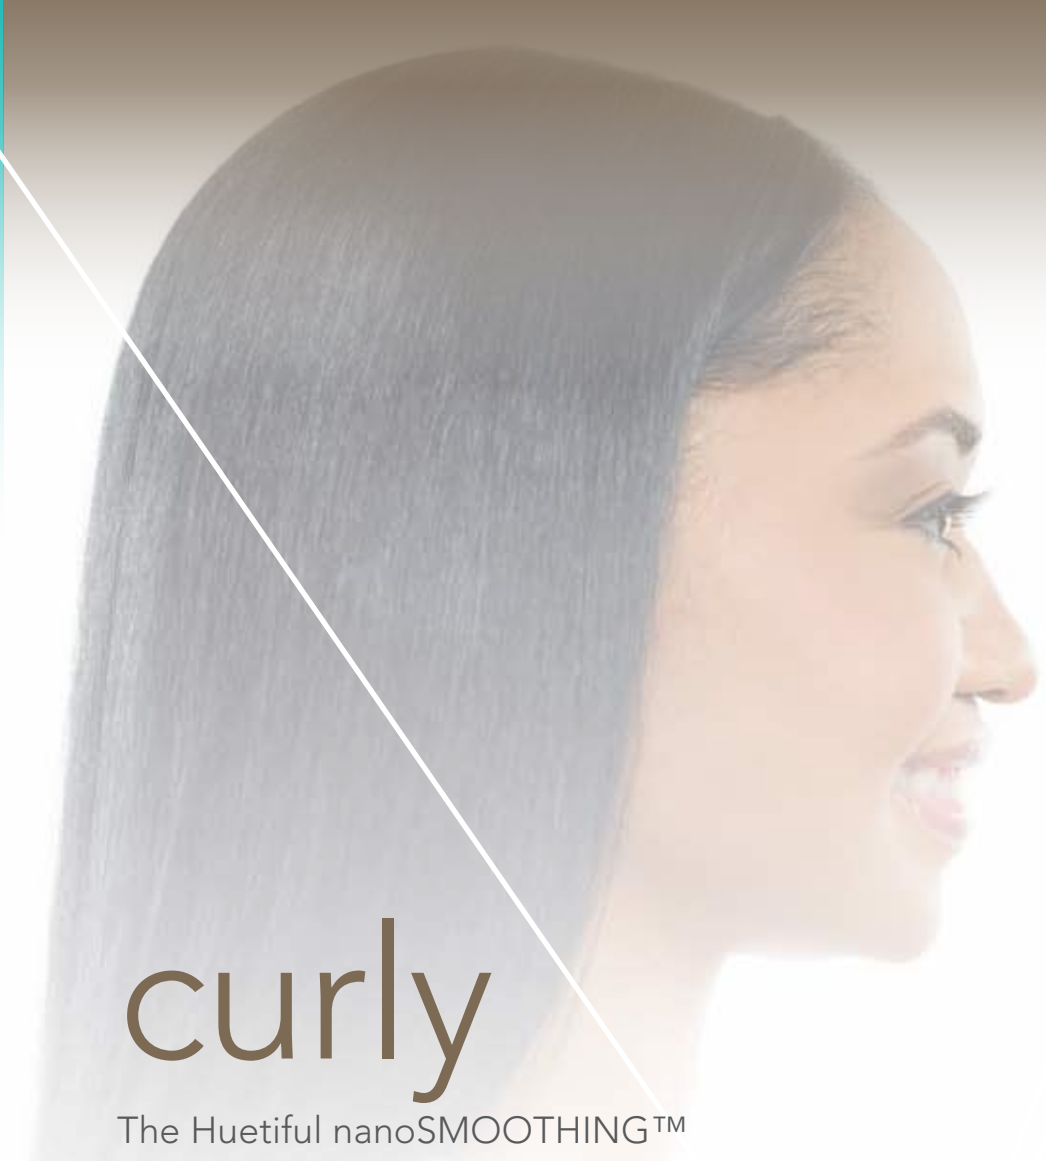

[for stronger, healthier, beautiful, manageable hair]

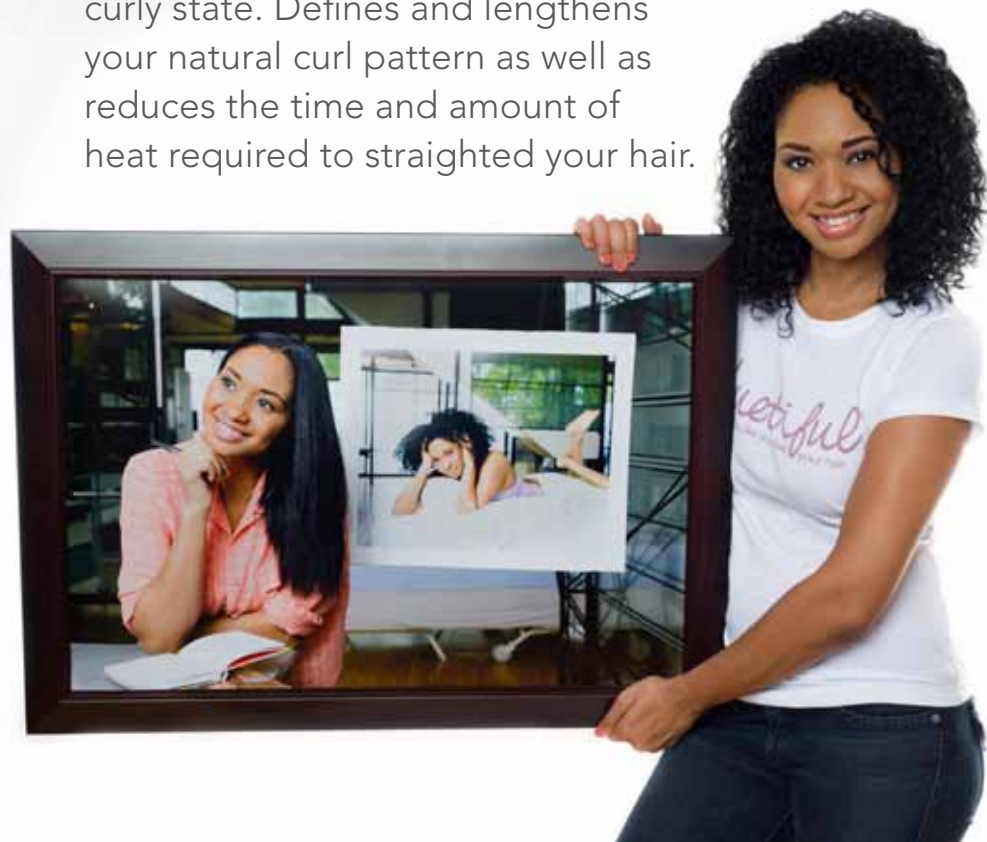

straight

The Huetiful nanoSMOOTHING™ System strengthens relaxed, transitioning or heat straightened hair. Reduces damage and eliminates split ends. Hair is stronger, silky smooth and unimaginely frizz free.

curly

The Huetiful nanoSMOOTHING™ System allows the versatility for hair to be worn straight or in its naturally curly state. Defines and lengthens your natural curl pattern as well as reduces the time and amount of heat required to straighten your hair.

coily

The Huetiful nanoSMOOTHING™ System loosens the curl pattern for more manageability. You get the flexibility of natural hair to be worn straight with resistance to humidity or worn with maximum curl definition and length.
