

HELIOS JETSKIMMER

- EXPERIMENTAL RULES 1.0

The Helios is a high speed attack unit, designed primarily to hunt down enemy aircraft. While somewhat less manoeuvrable than the true skimmers employed by the Shaltari and the Scourge, it can still use its speed to great effect in battle. It is armed only with the RXs-5 'Galaxy' multi-rocket launcher. For what this weapon lacks in power, it more than makes up for in terrific rate of fire, where the sheer quantity of shape charge munitions can even pose a threat to enemy armour.
