17" DROP-IN MOUNT BRUSHLESS FAN

- New "Brushless Only" Fan Size
- Drop-In Design Increases Shroud Strength
- Performance Boost vs All SPAL 16" Brushed Models
- Reduced Weight and Total Depth
- Full Variable Speed From 800 - 2800 RPM

SPAL has developed a new generation of brushless motors with integrated electronics built to IP68 and IP6K9K ingress protection (TÜV certified). Our motors are waterproof, provide superior performance and a longer life under all operating conditions.

The motor components are fully protected against dust, water, saline fog, chemical aggressions and are maintenance free over entire expected life.

- Soft Start In All Conditions, No Electrical Inrush Spikes
- Fan Performance Constant For Full Life, No Break In, No Degradation
- Battery Voltage Compensation Offers Constant Controlled Fan Speed
- -40°F to 240°F Ambient Operating Temperature Range (Includes De-Rating)
- Sensorless Sine Wave Drive Design For Smooth Reliable Operation
- Reduced Motor Depth & Weight While Increasing Performance vs Brushed Motor Fans
- Self Protecting From Mechanical Overload Over/Under Temperature & Voltage

SBL-TS (01, 02 & 03) // BRUSHLESS TEMP SENSORS

- Temperature Sensor Offerings For Full Variable Control Of SPAL Brushless Fans
- Optional Input Allows 100% Fan Speed For Air Conditioning Or Override Switch
