LED Ceiling panels

Widely used in offices , hospitals, schools, hotel lobbies, restaurants, painting studios and many places for illuminating and decoration. They can create ceiling display of blue sky, beaches, forests, mountains, rivers and a variety of patterns, which makes your space distinctive and comfortable, as if we were looking to a view through the window.

It's also an eye friendly product with low visual fatigue, the light created is even and soft, achieving a shadowless luminous performance as well.

LED sky ceilings, virtual skylights & windows

Beautiful, memorable, natural, relaxing...

“ Sky Ceiling provides us with sunshine 24 hours a day, 365 days a year ! “
The creation of illusions of nature
To enliven the innate human connection to nature and promote the healing relaxations of comfort, inner stability and vitality.

Wide applications:

LED dance floors, disco floors

Popular in parties, ballrooms, night clubs, pubs, theatres, luxurious hotels as well as shopping square. Consist of color-changing LED system and tempered glass surface, they are highly resistant to impact, assembly and placement are extremely simple and take only minutes to complete. These floors are so eye-catching and fascinating that they can also be used for trade show to attract attention.

LED flooring

LED wall light panel, murals
