## CURRENT COASTER™ ASSEMBLY INSTRUCTIONS

Congratulations and thank you for purchasing a CURRENT COASTER!

The 20" CURRENT COASTER is easy to assemble, virtually maintenance-free and built to last. We urge you to **read the Owner's Manual at [www.ridecurrent.com](http://www.ridecurrent.com)**. In addition to assembly details, it contains the product warranty and vital information that affects your safety.

While online, **register your new ride** so we can include you in product giveaways, special events, promotions, and notifications. Send us your best Current Coaster™ photos and video links - we may include them in our blogs and on our website! Show the world how you "Get Current"!

Assembly Instructions (See drawing on reverse side and Owner's Manual for more details.) Basic tools you need: Phillips head screwdriver, 10 & 15mm (or crescent) wrenches and 4 & 6mm Allen wrenches.

- 1) Carefully remove all packaging materials to avoid any scratches.
- 2) Connect fender stay to fender (open ends of axle loops facing down).
- 3) Turn the fork forward and pass the caliper brake rod and spacer through the fork. From behind the fork, slide on the spacer, fender tab, washer, and finish the assembly with the locking nut. Connect the brake line to the underside of the brake lever.
- 4) Assemble the front wheel (sidewall arrow pointing forward when at top), retaining clip and front fender stays to the axle. Stays must be mounted *outside* of the dropouts. Inflate tires, as indicated.
- 5) Connect the handlebar stem to the head tube/steerer, *ensuring that the quill is inserted beyond the minimum insertion mark*. Align handlebars and securely tighten the stem bolt and headset locknuts.
- 6) If desired, affix the white reflector tape (2 pieces) to the front forks and the red reflector tape to the rear fender or frame.
- 7) To lay the deck, slide in the rear end first, then carefully lower the front end into place. Secure with provided Allen bolts.
- 8) Register your Coaster online, get outside, put on a helmet and have a great ride!
