

Bio-identical Hormone Creams and Suppositories

NutriChem has been a leader in women's health issues, and has been supporting menopause through bio-identical hormone compounding for over 20 years.

NutriChem uses only the highest quality pharmaceutical-grade ingredients. In the case of vaginal applications, all ingredients have been proven to be safe and effective for this delicate area.

A pharmacist individually verifies each hormone cream. Proper applicators and instructions are also provided.

Doctors have a wide selection of hormones to choose for their patients: estrogen, estriol, Biest, Triest, testosterone and DHEA. Prescription support for doctors is available upon request.
