## CASHIER MONITORING module

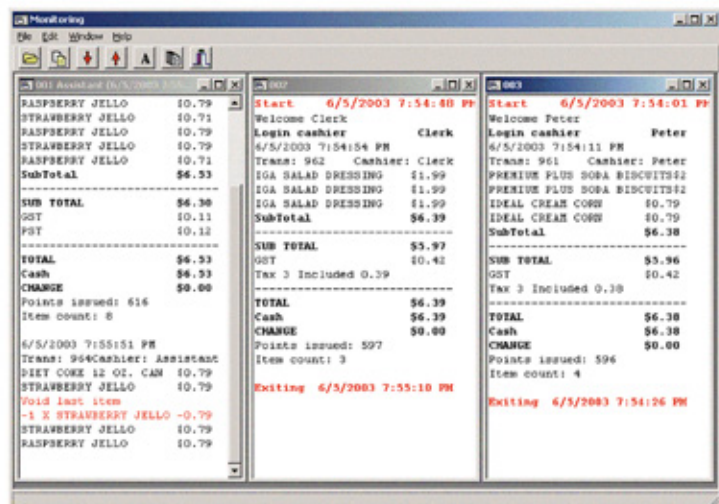

*L-POS and L-BOSS include an on-line cashier monitoring system.*

*You can monitor multiple terminals simultaneously and control cashier performance while keeping an eye on sweet hearting.*

*Cashier monitoring will assist you to control unknowns by catching them as they occur.*

### System features include:

- Easy set-up.
- Monitor multiple lanes simultaneously.
- Produce an audible tone when voids or other negatives are recorded on an L-POS terminal.
- Output data to digital recording systems in popular formats.
  - RS232 with programmable communication parameters.
  - TCP or UDP with user defined IP and port address.
  - Programmable data identifier to differentiate data from multiple POS terminals.
- System recovers from power down and restores previous settings to ensure maximum security level.

### System requirements

Windows XP or Windows 2000.  
PC PIII 700 or greater with 256 meg ram and 30 gig hard drive.  
L-BOSS and L-POS are required to use this optional module.
