## PC adapter Instructions:

Turn Off Computer!

Damage will result if you connect to PS/2 Keyboard Port with PC on.

The X-Arcade™ is recognized by your computer as a standard keyboard. This is a great benefit as you don't need to install my drivers or software.

1.) Turn off the computer! (unless using our USB adapter)

2.) Unplug keyboard from computer, plug it in back of X-Arcade™

3.) Connect either end of Serial Cable to PC adapter (provided)

4.Connect other end of Serial Cable to X-Arcade™

5.) Plug PC Adapter into your computer's PS/2 Keyboard Port.

X-Arcade Programming Instructions:

At first, programming the X-Arcade™ is best performed in Notepad, MS Word, or any text editor, so that you can see the results of the programming. As you become more accustomed to programming The X-Arcade™, it will be possible to program the X-Arcade™ "on the fly" within the game.

IMPORTANT NOTES:
When the light is on, you are in play mode. When the light is off you are in program mode.
Remember that MODE 1 (switch closest to the serial cable) cannot be programmed.
The keyboard must be plugged into the back of the X-Arcade to program it.
To change modes, you must slide the switch on the back to desired Mode position, and then press the SAVE/LOAD button TWICE to load that mode.
Programming is for the PC only, and does not function on game consoles.

1) Start by choosing the mode you wish to program by moving the switch away from the serial cable to MODE 2, 3, or 4. Again, MODE 1 cannot be programmed.

2) Press the SAVE/LOAD button on the back of the X-Arcade™ (the light turns off)

3) Press AND HOLD any button or direction on the X-Arcade that you wish to change

4) While still holding a button or direction from step 3, press and hold a key on your keyboard until the light on the X-Arcade blinks. Once it blinks it has been programmed, and you can release both held buttons/keys.

5) Repeat steps 3 and 4 to program additional buttons/directions. (do not hit SAVE/LOAD again)

6) When you have programmed everything the way you want, press the SAVE/LOAD button on the back of the X-Arcade once more to save your settings onto the internal memory chip.

7) Enjoy classic gaming!
