

# tec 805-12

## Economical mid-range glue gun

The new **tec 805-12** is an all-electric, industrial, high quality tool that is both robust and lightweight. Combining quality with cost efficiency, the **tec 805-12** gun is a professional mid-range gun for most gluing applications.

- Economic design.
- Fast heat-up time of only 3 minutes from cold.
- High glue output of over 1.8 kilos (4lbs) per hour.
- Narrow profile aids visibility, allowing molten glue to be placed with high accuracy.
- Runs on most voltages from 110V to 250V.
- Fitted with eco efficient self regulating 30W (250W) heaters.
- Adjustable full-hand lever trigger for optimum comfort.
- Multifunctional detachable base stand includes a nozzle wrench and stores the trigger-stop adjustment screw.
- Illuminated ON/OFF switch.
- Weighs only 450g (1lb).
- Designed to use standard 12mm (1/2") **tecbond** high performance, hotmelt glue sticks.
- The **tec 805-12** is built to comply with worldwide industrial & electrical safety standards & covered by a full one year warranty.

• Also available in low temperature 130°C (260F) version.
