

# tec 805-15

## Mid-range high-output glue gun

The new **tec 805-15** is a professional, low cost, high-output, all-electric, mid-range glue gun. It offers outstanding value and performance for a gun of this size. The **tec 805-15** dispenses 15mm (5/8") high performance **tecbond glue sticks** and can dispense 30% more molten glue from each trigger pull compared to similar sized 12mm (1/2") glue guns. It holds nearly 60% more glue so you need to reload less often.

- Economic design.
- Fast heat-up time of only 3 minutes from cold.
- High glue output of over 1.8 kilos (4 lbs) per hour.
- Narrow profile aids visibility, allowing molten glue to be placed with high accuracy.
- Runs on most voltages from 110V to 250V.
- Fitted with eco efficient self regulating 30W (250W) heaters.
- Adjustable full-hand lever trigger for optimum comfort.
- Multifunctional detachable base stand which includes a nozzle wrench and stores the trigger-stop adjustment screw.
- Illuminated ON/OFF switch.
- Weighs only 450g (16oz).
- Designed to use standard 15mm (5/8") **tecbond** high performance, hotmelt glue sticks.
- The **tec 805-15** is built to comply with worldwide industrial and electrical safety standards and covered by full one-year warranty

• Also available in low temperature 130°C (260F) version.

12mm (1/2") extension nozzle & rubber shroud

Takes 15mm (5/8") glue sticks

Detachable stand with nozzle wrench

Narrow profile to aid visibility

Illuminated ON-OFF switch

Comfortable to use with full-hand trigger
