**Cold and
Cold/Compression
Therapy**

“We Make House Calls!”

Benefits of Cold Therapy

Your doctor has prescribed a Controlled Cold Therapy unit for your use. A cold therapy unit can provide continuous, temperature-controlled cold therapy to the affected area for pain relief. Studies show that cold therapy is one of the most effective and soothing treatments for decreasing pain and swelling, and reducing the need for pain medication following surgery or injury.

Game Ready™ Cold/Compression Therapy

The Game Ready unit enables continuous, rapid circulation of ice water along with intermittent compression throughout dual action wraps. The unit is simple and convenient, and completely portable and lightweight. Featuring patented NASA space-suit technology, Game Ready is used by many medical practitioners, professional teams, and athletes for treatment of their injuries and post-surgical rehabilitation.

With Game Ready's flexible, circumferential, dual-action wraps and its adjustable settings

of time, temperature and compression, you can quickly recover from your injury and get "back in the game."

Continuous Controlled Cold Therapy Unit

With the Continuous Controlled Cold Therapy motorized unit, ice water is circulated through insulated tubing to a pad that is placed over your affected area. Temperature is easily controlled to provide cooling relief throughout your healing and recovery process. This product effectively cools tissue to provide an analgesic effect for acute and post-op pain relief.

By using this cold therapy unit immediately after surgery, you will be taking an important step in speeding up your recovery process.

Static Cold & Compression Wrap

The Static Cold & Compression Wrap gives compression with cold (or heat) to provide optimal control of swelling and pain. This product is simple to use and dry-cold and frostbite proof. Just place the brace in the freezer, then apply. A pump is included with each device to add compression and support, and wraps are available for all extremities. If your insurance does not cover the other two cold therapy products, you may want to select this product for its lower cost.

Insurance Information

J.I.M. Medical will contact your insurance company to verify your benefits and try to obtain authorization for your cold therapy unit. Most insurance plans have distinct guidelines for coverage regarding cold therapy.

We are a local company and are in-network with most plans. If we are not listed as a provider with your plan, we can make arrangements to obtain in-network benefits on your behalf.

In cases where insurance coverage is not available, J.I.M. Medical can offer discounted rates and monthly payment plans as necessary to ensure you access to the product your doctor has prescribed for you.

How do I get my cold or cold/compression therapy product?

Your provider will prescribe a cold or cold/compression therapy unit that will work best for you, and order it from J.I.M. Medical. In most cases, your unit will be delivered to you or your doctor's office prior to your surgery. If you do not have your product or have not heard from anyone by the week before your surgery, please contact J.I.M. Medical at (262) 547-4276 or toll free at (866) 546-4276. A representative will be sure to assist you.
