Pediatric Bracing

PediatricBracing

Jet

The Jet knee brace is designed with children in mind. The shorter frame fits proportionally to a child's leg length and the hinge has been reduced to match the anatomy of the smaller knee. The aircraft aluminum frame provides support, strength and durability, while still remaining lightweight. Brace migration is prevented by contouring and capturing the medial condyle as well as using supracondylar suspension to keep the brace in place.

Spacer designed padding allows the brace to be adjusted to the growing child for longer use. By removing or stacking the spacers, a three-point load system can also be created allowing the brace to be used for Juvenile Osteochondritis Dissecans.

- » 9" and 11" length frame
- » Reduced hinge size
- » Condylar suspension points
- » Spacer pads for size adjustments and unloading options

INDICATIONS:

Ligamentous injuries to the ACL, PCL, MCL, LCL, meniscus and Juvenile Osteochondritis Dissecans.

AVAILABLE:

Off-the-Shelf: S-XL
Custom

LENGTH:

S, M, L 9" (23 cm) frame
XL 11" (28 cm) frame

COLORS:

-  Hot Pink
-  Neon Green
-  Black

Wee ROM Post Op

A post op knee brace with telescoping bars to accommodate varying leg lengths.

- » Universal sizing
- » Telescoping bars adjust from 16" – 22" (41 – 56 cm)
- » Full range-of-motion hinge adjustable from -10 – 110 degrees
- » Cool version
- » Extends to malleolus

INDICATIONS:

Locked or limited motion control of the knee during rehabilitation, after operative procedures or injury to the knee ligaments, patellar ligament, articular cartilage, meniscus or stable internally fixed fractures of tibial plateau, condyles, proximal tibia or distal femur.

AVAILABLE:

Universal

Pediatric Bracing

Padded Sleeve

Padded sleeve provides cushion and protection. Durable foam construction is designed to withstand up to the toughest of conditions.

- » Foam pad protects the patella and patellar tendon
- » Neoprene anterior for compression and warmth
- » Soft TriTech™ material posterior for breathability and freedom of movement
- » Low-profile seams minimize irritation

INDICATIONS:

Protection from contusions, bone bruises, Osgood-Schlatter disease, tendonitis and bursitis

AVAILABLE:

XS – 3XL

Wee Bow Post Op

Locked or limited motion control of the elbow during rehabilitation, after operative procedures or injury to the elbow.

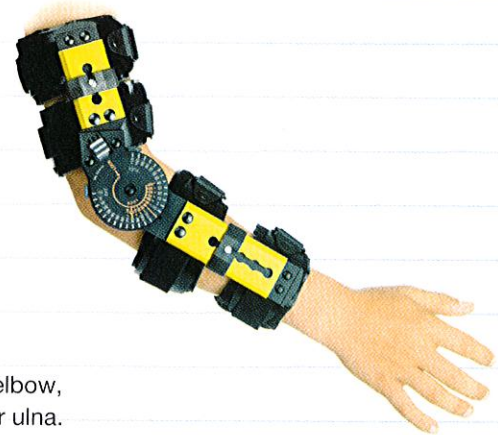

- » Universal sizing
- » Telescoping bars adjust from 10 1/4" - 13 1/4" (26 – 34 cm)
- » Full range-of-motion hinge adjustable from -10 – 110 degrees
- » Cool version

INDICATIONS:

For immediate application following injury or operative procedures to the elbow, or for stable fractures of the distal humerus or proximal to middle radius or ulna.

AVAILABLE:

Universal

Wee Walker

The original children's walker boot, designed to fit children as young as one year.

- » Durable aluminum tough enough for average kids
- » Heel height, width and rocker bottom designed for small children
- » Forefoot straps immobilize the ankle

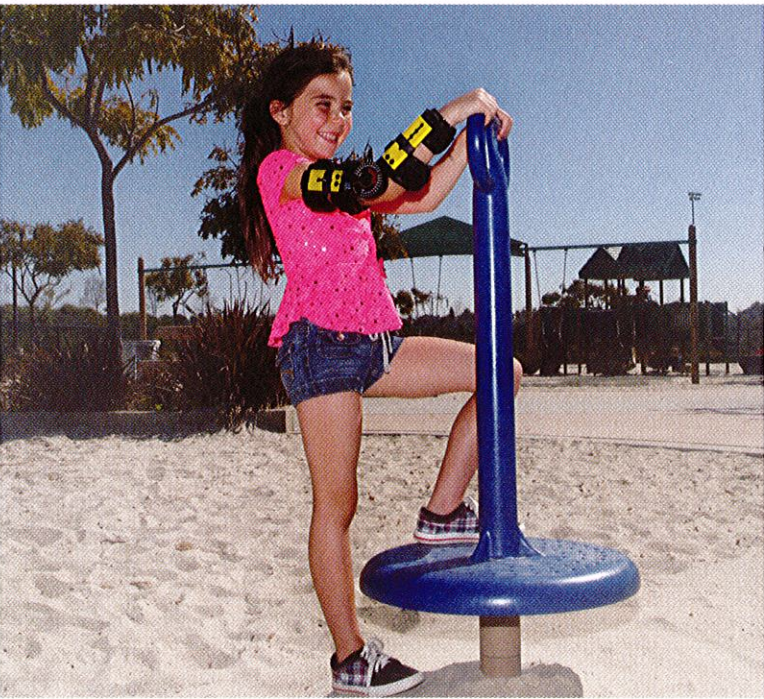

INDICATIONS:

For ankle sprains and fractures, forefoot sprains and stable distal tibial fractures

AVAILABLE:

S – XL
